Accession Of China To The Wto:

Handbook on China's Wto Accession and Its Impacts Cheong Ching, Hung Yee Ching, 2003 This handbook highlights the important commitments that China has made to the international community and analyzes the potential impact of such commitments on China Part I of the book outlines China's commitments to convert her economy from a centrally planned one to a free market one as far as cross border movement of goods services and personnel is concerned It reproduces China's commitments in a tabular format to facilitate reading and is supplemented with brief references to WTO regulations where appropriate so that readers get to know how China's commitments relate to WTO obligations Part II examines the impacts of China's WTO membership as a whole and on her specific economic sectors Part III consists of tables and figures selected from a report compiled by the US General Accounting Office presenting some of the Office's analysis and findings of China's commitments on WTO accession Appendix 1 lists all the legal instruments pertaining to China's accession to the WTO

China and the WTO Deepak Bhattasali, Shantong Li, William J. Martin, 2004-07-09 China's accession to the WTO requires a great many specific policy reforms However if the best results are to be obtained it is important that these reforms be implemented as part of a consistent development program rather than simply by treating them as a recipe To do this policy makers must understand the range and nature of the policy changes required by accession their implications for the economy and the availability and effects of supporting policies China and the WTO analyzes the nature of the reforms involved in China's accession to the WTO assesses their implications for the world economy and examines the implications for individual households particularly the poor Its key objective is to provide the information that will allow policy makers to implement WTO commitments and formulate supporting policies to contribute strongly to economic development and poverty reduction Individual chapters by leading scholars analyze the nature of the reforms in key areas such as agriculture services intellectual property and safeguards and anti dumping These chapters form the building blocks for later chapters which analyze the implications of reform for the economy The book also includes a series of studies that assess the implications for households taking into account the social safety net policies applying in China and the impacts of complementary policies in areas such as labor market reform and investments in human capital Of interest to policymakers academics and students studying international trade issues and to practitioners in the area of trade and development China and the WTO is a valuable addition to the wealth of information provided by the World Bank Trade and Development Series

The difficulties surrounding China's accession to the World Trade Organisation, and the likely impacts on China's economy in post-WTO China Ben Beiske, 2003-07-17 Seminar paper from the year 2003 in the subject Politics Topic International Organisations grade 1.6 A University of Manchester Manchester School of Management course Manchester School of Management language English abstract What were the difficulties surrounding China's accession to the World Trade Organisation WTO Why has it taken the People's Republic of China PRC over 15 years to join What are the expected

benefits and disadvantages of joining What changes is WTO membership likely to bring to China's economy in the future These are the question this paper will address WTO accession by China is often seen as the most significant event about China in the last decade even ahead of the Taiwan Independence issue which continues to penetrate world news periodically Since the end of the Cultural Revolution in 1978 China has been on a course of economic reform Today Chinese are richer than ever before in history with the country itself having experienced extended periods of extraordinary growth Specifically this report will highlight China's first attempts to join the WTO more than 15 years ago in chapter two Chapter three will focus on the main areas of difficulty surrounding WTO accession while chapter four will comment on the final accession in December 2001 The expected economic advantages and disadvantages for China will be discussed in chapter five finally chapter six will offer a brief future outlook for China again mainly from an economic perspective

China and the WTO Esther Lam, 2009-10-08 Joining the World Trade Organization WTO enables China to reform its legal order and to move towards a system incorporating major principles of the rule of law The WTO also serves as an external impetus that guides contemporary Chinese legal reform and orients it in ways that domestic forces alone could not achieve and sustain Much discussion on the WTO and the Chinese legal system has focused on the issue of compliance whether the Chinese legal system has the capacity to fulfill China's WTO accession commitments The focus of this work is less concerned with compliance issues per se but rather with the extent to which the WTO's requirements vis vis China actually affect the Chinese legal system The fine difference between the two approaches lies in the fact that efforts by the Chinese government to meet its WTO obligations necessarily impact the Chinese legal order and its way of functioning even if their end results may or may not lead to full compliance with what is required of it by the WTO This timely work exposes many behind the scene dealings and relies on valuable information that is not publicly available Not only does it preserve for the historical record important details of the Chinese WTO accession it also sheds light on the travaux préparatoires of China's accession agreement and the negotiation history of important issues some of which remain relevant and highly contentious today As expressed by WTO Director General Pascal Lamy in his foreword to the book through this work Esther Lam succeeds in demonstrating how WTO membership can benefit both the acceding country and the wider WTO family of nations

China's Accession to the World Trade Organization , Accession of China to the WTO United States. Congress. House. Committee on Ways and Means, 2001 *China and the WTO* Supachai Panitchpakdi, Mark L. Clifford, 2002-01-25 This work analyses the implications for world trade of China's entry into the World Trade Organization It has taken fifteen long years of dialogue and heated debate and it will take its place among the other members at the end of 2001 This momentous event is relayed by the next WTO Chairman

The Politics of China's Accession to the World Trade Organization Hui Feng, 2006-01-16 Grounded on a series of first hand interviews with Chinese government officials this book examines China's accession to the World Trade Organization providing an inside look at Chinese WTO accession negotiations Presenting a

systematic political economy model in analyzing Beijing's decision making mechanisms the book argues that China's WTO policy making is a state led leadership driven and top down process Feng explores how China's determined political elite partly bypassed and partly restructured a largely reluctant and resistant bureaucracy under constant pressure from an increasingly globalized international system By addressing China's accession to the WTO from a political analysis perspective the book provides a theoretically informed and intriguing examination of China's foreign economic policy making regime The book highlights contemporary debates relating to state and institutionalist theory and provides new and useful insights into a significant development of this century

Economic Impacts of China's Accession to the World Trade Organization Elena Ianchovichina, Will Martin, 2003 Abstract 1 billion and trade reforms after accession will lead to additional gains of around Ianchovichina and Martin present estimates of the impact of accession by China and Chinese Taipei to the World Trade Organization China is estimated to be the biggest beneficiary followed by Chinese Taipei and their major trading partners Accession will boost the labor intensive manufacturing sectors in China especially the textiles and apparel sector that will benefit directly from the removal of quotas on textiles and apparel exports to North America and Western Europe Consequently developing economies competing with China in third markets may suffer relatively small losses China has already benefited from the reforms undertaken between 1995 and 2001 US *The Impact of China's WTO Accession on East Asia* Elena Ianchovichina, Terrie Louise Walmsley, 2003 Abstract China's World Trade Organization WTO accession will have major implications for China and present both opportunities and challenges for East Asia Ianchovichina and Walmsley assess the possible channels through which China's accession to the WTO could affect East Asia and quantify these effects using a dynamic computable general equilibrium model China will be the biggest beneficiary of accession followed by the industrial and newly industrializing economies NIEs in East Asia But their benefits are small relative to the size of their economies and to the vigorous growth projected to occur in the region over the next 10 years By contrast developing countries in East Asia are expected to incur small declines in real GDP and welfare as a result of China's accession mainly because with the elimination of quotas on Chinese textile and apparel exports to industrial countries China will become a formidable competitor in areas in which these countries have comparative advantage With WTO accession China will increase its demand for petrochemicals electronics machinery and equipment from Japan and the NIEs and farm timber energy products and other manufactures from the developing countries in East Asia New foreign investment is likely to flow into these expanding sectors The overall impact on foreign investment is likely to be positive in the NIEs but negative for the less developed East Asian countries as a result of the contraction of these economies textile and apparel sector As China becomes a more efficient supplier of services or a more efficient producer of high end manufactures its comparative advantage will shift into higher end products This is good news for the poor developing economies in East Asia but it implies that the impact of China's WTO accession on the NIEs may change to include heightened competition in global markets This

paper a product of the Economic Policy Division Poverty Reduction and Economic Management Network is part of a larger effort in the network to assess the impact of China's WTO accession
