Academic Motivation Of Adolescents Adolescence And Education Series:

Academic Motivation of Adolescents Tim Urdan, Frank Pajares, 2002-09-01 Few academic issues are of greater concern to teachers parents and school administrators than the academic motivation of the adolescents in their care There are good reasons for this concern Students who are academically motivated perform better in school value their schooling are future oriented in their academic pursuits and possess the academic confidence and positive feelings of self worth so necessary to increasing academic achievement Because academically motivated students engage their schoolwork with confidence and interest they are less likely to drop out of school suffer fewer disciplinary problems and prove resilient in the face of setbacks and obstacles It is precisely because academic motivation is so essential to academic achievement that motivation has taken a place along with cognition as one of the most followed lines of inquiry in educational psychology In this volume we are fortunate to gather together some of the most eminent scholars who have written extensively about the academic motivation of adolescents We are fortunate also in that they represent the varied theories and lines of inquiry that currently dominate research in this area In all we believe that in the dozen chapters that comprise this volume the authors provide elegant insights regarding the academic and social motivation of adolescents that will prove of interest to researchers students teachers school administrators parents policymakers and all others who play a pivotal role or are otherwise invested in the lives of adolescents in today s society It is our hope that these insights will not only further the conversation on adolescence and education but will serve as the impetus for further research capable of generating the creative ideas programs and structures so necessary to better the lives of the young people in our care *Handbook of Educational Psychology* Patricia A. strategies and tools for assessment and evaluation for professionals *Future Orientation* Rachel Seginer, 2009-04-21 By contemporary I mean a present with an anticipated future for we must do our best to overcome clinical habits which make us assume that we have done our part if we have clarified the past Erikson 1968 pp 30 31 The scope of time ahead which influences present behavior and is therefore to be regarded as part of the present life space increases during development This change in time perspective is one of the most fundamental facts of development Adolescence seems to be a period of particularly deep change in respect to time perspective Lewin 1939 p 879 I chose to open this book with two excerpts from Erikson's and Lewin's writings because they indicate that future orientation has had its deep roots in psychological thinking and call readers attention to the long standing interest in two fundamental issues the motivational power of constructed future images and their development across age More specifically Erikson and Lewin's writings underscore the importance of future thinking for influencing present behavior tendencies and point out that the ability to think about the future and realize the scope of time ahead increase with age and reach a special developmental significance in adolescence **Developmental Science** Marc H. Bornstein, Michael E. Lamb, 2015-07-24 Developmental Science An Advanced Textbook is the most complete and cutting edge introduction to the field available today Since its initial publication the key purpose of the text has been to furnish inclusive developmental perspectives on all substantive areas in psychology neuroscience perception cognition language emotion and social interaction This edition is no exception as it continues to underscore the dynamic and exciting status of contemporary developmental science In this Seventh Edition Marc H Bornstein and Michael E Lamb once again invite international experts to prepare original comprehensive and topical treatments of the major areas of developmental science which are masterfully woven into a single coherent volume Some chapters in this edition are new and those carried forward from the sixth edition have been extensively revised This volume represents faithfully the current status of scholarly efforts in all aspects of developmental science Ideal for advanced undergraduate and introductory graduate courses the text is accompanied by a website with supplementary material for students and instructors including chapter outlines topics to think about before reading glossaries and suggested readings *The Ones We Remember* Tim Urdan, Frank Pajares, 2008-08-01 Paulo Freire wrote that sometimes a simple almost insignificant gesture on the part of a teacher can have a profound formative effect on the life of a student Sometimes of course this formative effect is not the result of a simple isolated gesture but rather of a proactive and sustained series of gestures on the part of a teacher Many of us have been deeply influenced by one or more teachers who have exercised a formative effect in our development as students and individuals We remember these teachers with fondness tell their stories to our own children think of them with affection respect gratitude even reverence Sometimes we recognized this influence as it was happening and we grew close to these remarkable individuals keeping them in our lives even after we graduated from their classes Often however they themselves were unaware of the influence they exercised over us for it was not until years passed that we realized their effect If time and

distance did not prevent it perhaps we found our way back to these educators and shared with them our appreciation and gratitude In this volume outstanding scholars in the fields of adolescence and education provide short stories describing their most memorable teacher Some provide the story on its own other follow it with a brief analysis drawn from theory and research in education psychology and human development to identify key concepts and principles that apply in explaining why the selected teacher was so effective and memorable Some write about one specific teacher others write about the qualities that they believe contribute to teaching excellence including anecdotes from various teachers to support the qualities they identified Each tells the story with an eye toward being accessible to a wide audience of readers One need not be an academic or an expert in education or psychology to understand and find meaning in these stories In essence these are stories and analyses that capture just what it is that makes a particular teacher as our title describes unforgettable This book would be excellent for teacher preparation courses educational psychology courses and for anyone who is interested in the art and science of teaching
