Rudin, **News Media and the Neoliberal Privatization of Education** Zane C. Wubbena, Derek R. Ford, Brad J. Porfilio, 2016-03-01 This edited volume contributes to a burgeoning field of critical scholarship on the news media and education This scholarship is based on an understanding that the news media has increasingly applied a neoliberal template that mediates knowledge and action about education This book calls into question what the public knows about education how the public is informed and whose interests are represented and ultimately served through the production and distribution of information by the news media about education The chapters comprising this volume serve to enlighten and call to action parents students educators academics and scholars activists and policymakers for social political and economic transformation Moreover as the neoliberal agenda in North America intensifies the chapters in this book help to deepen our understanding of the logics and processes of the neoliberal privatization of education and the accompanying social discourses that facilitate the reduction of social relations to a transaction in the marketplace The chapters examine the news media and the reproduction of neoliberal educational reforms A Nation at Risk Teach For America charter schools think tanks and PISA and resistance to neoliberal educational reforms online activism and radical Black press while also broadening our conceptual understanding of the marketization and mediatization of educational discourses Overall the book provides an in depth understanding of the neoliberal privatization of education by extending critical examinations to this underrepresented field of cultural production the news media coverage of education The contribution of this edited volume therefore helps to build an understanding of the contemporary dynamics of capital accumulation to inform public resistance for social transformation **Private Financing of Public Transportation Infrastructure** Wendell C. Lawther, Lawrence L. Martin, 2015-10-22 This book discusses a unique combination of best practices and lessons learned including evaluation and transparency issues not found elsewhere in other texts Given that P3s are evolving and changing it contains the most up to date information and review of relevant sources Other topics that have become more important are reviewed including the value of benefit cost analysis and the appropriate discount rate to use for value for money analysis Practices and policies are discussed throughout highlighting efforts that could lead to successful outcomes Although transparency is an issue discussed by many this research indicates that greater transparency would lead to more publicly accepted P3s and ensure greater success Given recent national news coverage of relevant topics such as the Highway Trust Fund running out of money President Obama s call for an infrastructure fund and increasing Congressional interest and testimony the content of this book is timely A concurrent theme commonly addressed by other books and commentaries is the complexity of the topic and the lack of understanding of P3s This research identifies practices and procedures that are innovative and cutting edge Many of the best practices identified are not uniformly

adopted by all officials wishing to create P3s The analysis does not simply describe these practices but provides insights into the potential advantages of adoption Experiences in the United States as well as selected international efforts provide a wide range of potential sources from which to draw upon This book provides a series of case studies and examples including one chapter devoted to ten studies that were written by several internationally known authors References to actual experiences are found throughout almost all of the chapters These case studies reinforce and illustrate relevant points made throughout
