Ideal for introducing the novice researcher to the theory and practice of qualitative research, this text opens students to the diverse possibilities within this inquiry approach while helping them understand how to design and implement specific research methods. The author's accessible writing style, the wealth of examples, and the numerous exercises provide opportunities for practicing and refining the skills of becoming a qualitative researcher. The new edition focuses on the development of research proposals. Ch 2 the history and concerns of institutional review boards IRBs and issues qualitative researchers sometimes confront when submitting proposals. Ch 6 greater information and examples on coding and thematic analysis while also introducing other approaches to data analysis. Ch 7 and arts based research through a chapter that encourages consideration of creative ways to approach and represent inquiry. Ch 9 Chapter 10 looks at sharing research results through participation at conferences and in publications.

Becoming Qualitative Researchers Corrine Glesne, Alan Peshkin, 1992 This gracefully written text takes the reader through each stage of the qualitative research process: research design, pilot studies, interviewing techniques, use of theory, data analysis, and report writing. Features unique chapters on rapport and subjectivity and one on ethics in qualitative research. Uses the voices and experiences of typical graduate students to engage readers in understanding the nature, methods, and problems encountered in carrying out qualitative studies. Presents the newest thinking in qualitative research: Postmodern Ethnography, including discussions of issues of power and control in relation to knowledge; how history and culture shape the researcher's perspective; and how the researcher and researched affect each other. **BOOK COVER**
