The Grammar of Copulas Across Languages María J. Arche, Antonio Fábregas, Rafael Marín, 2019-01-03 This volume presents a crosslinguistic survey of the current theoretical debates around copular constructions from a generative perspective Following an introduction to the main questions surrounding the analysis and categorization of copulas the chapters address a range of key topics including the existence of more than one copular form in certain languages the factors determining the presence or absence of a copula and the morphology of copular forms The team of expert contributors present new theoretical proposals regarding the formal mechanisms behind the behaviour and patterns observed in copulas in a wide range of typologically diverse languages including Czech French Korean and languages from the Dene and Bantu families Their findings have implications beyond the study of copulas and shed more light on issues such as agreement relations the nature of grammatical categories and nominal predicates in syntax and semantics

Questions of Syntax Richard S. Kayne, 2019-03-22 There are far more syntactically distinct languages than we might have thought yet there are far fewer than there might have been Questions of Syntax collects sixteen papers authored by Richard S Kayne a preeminent theoretical syntactician who has sought over the course of his career to understand why both these facts are true With a particular emphasis on comparative syntax these chapters collectively consider how wide a range of questions the field of syntax can reasonably attempt to ask and then answer At issue among other topics are the relation between syntax and certain aspects of semantics the relation between syntax and what appear to be lexical questions the relation between syntax

and morphology the relation between syntax and certain aspects of phonology insofar as silent elements and their properties play a substantial role and the extent to which comparative syntax can provide new and decisive evidence bearing on these different kinds of questions To Kayne comparative syntax can shed light on what may initially seem lexical questions and antisymmetry on the evolution of human language itself Taken as a whole these essays elucidate the theoretical contributions of one the most influential scholars in linguistics *Polynesian Syntax and Its Interfaces* Lauren Clemens, Diane Massam, 2021 This volume brings together current research in theoretical syntax and its interfaces in the Polynesian language family Chapters offer in depth analyses of a range of theoretical issues of particular interest for comparative syntactic research such as ergativity and case systems negation and the left periphery **A Cross-linguistic Approach to the Syntax of Subjunctive Mood** Lena Baunaz, Genoveva Puskás, 2022-07-11 This monograph gives a unified account of the syntactic distribution of subjunctive mood across languages including Romance Balkan South Slavic and Modern Greek and Hungarian among others Starting from a close scrutiny of the environments in which subjunctive mood occurs and of its semantic contribution we present a feature based approach which reveals the common properties of the class of verbs which embed subjunctive and which takes into account the variation in subjunctive related complementizers Two main proposals can be highlighted i the lexical semantics of the main clause predicate plays a crucial role in mood selection More specifically subjunctive mood is regulated by a specific property of the main predicate the emotive property which is associated with the external argument of the embedding verb usually the Subject The book proposes a nanosyntactic analysis of the internal structure of embedding verbs ii Cross and intra linguistic variations are dealt with according to different patterns of lexicalization i e variations depend on what portions of the verb s and complementizer s functional sequence is lexicalized and on how it is packaged by languages In doing so this approach provides a uniform account of the phenomenon of embedded subjunctives The monograph takes a novel feature based approach to the question of subjunctive licensing providing a detailed analysis of the features of the matrix verb of the complementizer and of the embedded subjunctive clause It is also based on a wide empirical coverage ranging from the relatively well studied groups of Romance and Balkan languages to less explored languages from non Indo European families Hungarian
