Going to Extremes National Research Council, Division on Engineering and Physical Sciences, National Materials Advisory Board, Committee on Durability and Life Prediction of Polymer Matrix Composites in Extreme Environments, 2005-10-22 Advanced polymer matrix composites PMC have many advantages such as light weight and high specific strength that make them useful for many aerospace applications Enormous uncertainty exists however in predicting long term changes in properties of PMCs under extreme environmental conditions which has limited their use To help address this issue the

Department of Defense requested a study from the NRC to identify the barriers and limitations to the use of PMCs in extreme environments. The study was to focus on issues surrounding methodologies for predicting long term performance. This report provides a review of the challenges facing application of PMCs in extreme environments, the current understanding of PMC properties and behavior, an analysis of the importance of data in developing effective models and recommendations for improving long term predictive methodologies.
