Acupuncture Meridian Theory And Acupuncture Points:

Acupuncture, Meridian Theory and Acupuncture Points 俞本林, Benlin You, 1991-01-01 **Acupuncture, Meridian Theory, and Acupuncture Points** Ding Li, 1992 According to many years teaching and clinical experience Dr Li Ding has combined the meridian theory with Qigong's characteristic of regulating respiration and transmitting the Qi vital energy in human body to create Meridian Qigong in July 1985 **Meridians and Stable Water Clusters** Shui Yin Lo, 2013-01-24 With thousands of years history and your own experience in using or benefiting from meridian based medical practices you many not feel that you need physical proof of the existence of meridian lines and points However it is the lack of visual proof that has kept the Western health community including the insurance companies from fully accepting the practices of the East like acupuncture and acupressure Those who understand meridian theory know that it is not just the ability to help heal that is important in Eastern practice but the focus on health maintenance through maintaining the flow of energy throughout the body There are many people trying to establish the proof of meridian theory and this book contributes to this goal by presenting a sample of the work of Dr Shui Yin Lo who uses infrared photography in his research and has discovered its ability to reveal easily the 14 major meridians in Eastern meridian theory We all know that we need a more efficient and cost effect approach to medical care and this book will provide a major steppingstone towards that goal **Meridians and Acupoints** Bing Zhu, Hongcai Wang, 2011-02-15 An in depth understanding of the meridians and acupoints lies at the heart of effective practice in traditional Chinese medicine This book outlines everything that practitioners and students need to know *Acupuncture Therapy for Neurological Diseases* Ying Xia, Xiaoding Cao, Gen-Cheng Wu, Jieshi Cheng, 2010-09-08 Acupuncture therapy has been practiced in China and other Asian countries for more than two thousand years Modern clinical research has confirmed the impressive therapeutic effect of acupuncture on numerous human ailments such as controlling pain nausea and vomiting However the biological mechanisms of acupuncture are still under debate In Traditional Chinese Medicine TCM the mechanism of acupuncture therapy is explained by a meridian model According to this model acupuncture is believed to treat the diseased organs by modulating two conditions known as Yin and Yang which represent all the opposite principles that people find in the universe both inside and outside the human body Yin and Yang complement each other and are subjected to changes between each other The balance of Yin and Yang is thought to be maintained by Qi an energy substance flowing constantly through the meridian a network connecting all the organs of the body The illness according to this theory is the temporary dominance of one principle over the other owing to the blockade of the Qi from flowing through the meridian under certain circumstance The axiom of No stagnation No pain in TCM summarizes this concept Thus the goal of acupuncture treatment is to restore the balance of Yin and Yang conditions in the diseased organ s This theory has been considered to be useful to guide this ancient therapy such as carrying out diagnosis deciding on the principle and selecting the acupoints *Acupuncture: Theories And Evidence* Hai Hong, 2013-03-07 Acupuncture is widely

practised in the 21st century in scientifically developed countries for a wide range of ailments ranging from chronic pain, giddiness and high blood pressure to gastrointestinal disorders and sexual dysfunction. Yet the reasons for its vaunted efficacy remain a matter of controversy. In traditional Chinese medical theory, the mechanism of action in acupuncture was understood in terms of the flow of qi and the balance of yin and yang through the body's meridians, a complex network painstakingly charted but never found. Modern medical researchers have examined old and new needling points and some view them as trigger points that stimulate physiological responses in the body. There is also clear evidence of strong placebo effects, although it has not been conclusively established that this is either the main or the only significant effect. This volume contains twelve articles covering the latest scientific explanations of the mechanism of acupuncture and critical reviews of clinical trials on its efficacy by leading scholars including Edzard Ernst at Exeter, Lixing Lao at the University of Maryland, PC Leung at the Chinese University of Hong Kong and Thomas Lundberg at Karolinska Institute. Hong Hai is Senior Fellow at the Institute of Advanced Studies and Adjunct Professor, Nanyang Technological University, Singapore and Director of the Renhai Clinic.
