Secure Online Voting Using Biometric Authentication and Public Key Encryption Ajish S, K S Anil Kumar, 2025-10-24 In an age of rapid technological progress and digital transformation the convergence of voting systems and biometric authentication stands as one of the most pressing areas for innovation and security The transition from traditional paper ballots to electronic voting has been a subject of intense debate for years with concerns over privacy accuracy and security often taking center stage As we strive to make voting systems more accessible efficient and secure the integration of biometric authentication offers a promising solution to some of these challenges Secure Online Voting Using Biometric Authentication and Public Key Encryption provides a comprehensive exploration of the technologies methodologies and potential applications of biometric systems in internet voting From understanding the different types of biometric data to examining the advantages and challenges of implementing such systems on a global scale it lays out both the theoretical and practical aspects of building a secure online voting infrastructure The exploration of cryptographic solutions and the legal and ethical implications of biometric data collection also form a critical part of the narrative However as with any new technology the adoption of internet voting with biometrics comes with its set of challenges Privacy concerns data protection regulations the risk of cyberattacks and the

digital divide all require careful consideration and a thoughtful approach to ensure the success of such systems This book addresses these concerns head on providing a balanced view of the promises and pitfalls of this transformative technology As we venture into this brave new world of digital democracy the insights offered in Secure Online Voting Using Biometric Authentication and Public Key Encryption are invaluable for policymakers technology developers security experts and anyone interested in the future of democratic participation It not only illuminates the technical possibilities but also explores the broader implications of this technology offering a road map for the future of democratic elections in the digital age

Biometric Authentication David Y. Zhang, Anil K. Jain, 2004-07-16 The past decade has seen a rapid growth in the demand for biometric based authentication solutions for a number of applications With significant advances in biometric technology and an increase in the number of applications incorporating biometrics it is essential that we bring together researchers from academia and industry as well as practitioners to share ideas problems and solutions for the development and successful deployment of state of the art biometric systems The International Conference on Biometric Authentication ICBA 2004 was the first major gathering in the Asia Pacific region devoted to facilitating this interaction We are pleased that this conference attracted a large number of high quality research papers that will benefit the international biometrics research community After a careful review of 157 submissions 101 papers were accepted either as oral 35 or poster 66 presentations In addition to these technical presentations this conference also presented the results and summaries of three biometric competitions Fingerprint Verification Competition FVC 2004 Face Authentication Competition FAC 2004 and Signature Verification Competition SVC 2004 This conference provided a forum for the practitioners to discuss their practical experiences in applying the state of the art biometric technologies which will further stimulate research in biometrics We are grateful to Jim L. Wayman Edwin Rood Raymond Wong Jonathon Philips and Francis Ho for accepting our invitation to give keynote talks at ICBA 2004 In addition we would like to express our gratitude to all the contributors reviewers program committee and organizing committee members who made this a very successful conference We also wish to acknowledge the Croucher Foundation the International Association of Pattern Recognition IEEE Hong Kong Section the Hong Kong Polytechnic University the National Science Foundation in China and Springer Verlag for sponsoring this conference
