Being Will Help You Learn:

The HM Learning and Study Skills Program Judy Tilton Brunner, Matthew S. Hudson, 2016-10-14 Level III Grades 11-13 The HM Learning and Study Skills Program Level III was designed to provide an introduction to learning and study skills for high school juniors and seniors and beginning college students through a series of activity oriented units. It is structured on the assumption that an activity oriented lesson is the most effective instructional strategy for the teaching of study skills more succinctly that learning by doing is the best way study smart. Learning and study skills are important for learning. They are methods and ways of doing things that help make learning easier. Understanding how to study can also facilitate learning by assisting students as they complete assignments correctly and efficiently during a specified period of time. Just like any other skill, knowing how to learn and study proficiently must be learned and practiced over time. The Program has been designed to help students learn more efficiently and effectively.

Can You Learn to Be Lucky? Karla Starr, 2018-08-14 I don't know when I've been so wowed by a new author. Chip Heath co-author of *The Power of Moments* and *Switch*. A talented journalist reveals the hidden patterns behind what we call luck and shows us how we can all improve outcomes despite life's inevitable randomness. Do you believe in luck? Is it a polarizing question one you might ask on a first date? Some of us believe that we make our own luck. Others see inequality everywhere and think that everyone's fate is at the whim of the cosmos. Karla Starr has a third answer: unlucky random outcomes have predictable effects on our behavior that often make us act in self-defeating ways without even realizing it. In this groundbreaking book, Starr traces wealth, health, and happiness back to subconscious neurological processes, blind cultural assumptions, and tiny details you're in the habit of overlooking. Each chapter reveals how we can cultivate personal strengths to overcome life's unlucky patterns. For instance, Everyone has free access to that magic productivity app, motivation. The problem? It isn't evenly distributed. What lucky accidents of history explain patterns behind why certain groups of people are more motivated in some situations than others? If you look like an underperforming employee, your resume can't override the gut-level assumptions that a potential boss will make from your LinkedIn photo. How can we make sure that someone's first impression is favorable? Just as people use irrelevant traits to make assumptions about your intelligence, kindness, and trustworthiness, we also make inaccurate snap judgments. How do these judgments affect our interactions, and what should we assume about others to maximize our odds of having lucky encounters? We don't always realize when the world's invisible biases work to our advantage or recognize how much of a role we play in our own lack of luck. By ending the guessing game about how luck works, Starr allows you to improve your fortunes while expending minimal effort.
