Innovating Democracy Robert E. Goodin, 2008-07-10 In recent years democratic theory has taken a deliberative turn Instead of merely casting the occasional ballot deliberative democrats want citizens to reason together They embrace talk as a decision procedure But of course thousands or millions of people cannot realistically talk to one another all at once When putting their theories into practice deliberative democrats therefore tend to focus on mini publics usually of a couple dozen to a couple hundred people The central question then is how to connect micro deliberations in mini publics to the political decision making processes of the larger society In *Innovating Democracy* Robert Goodin surveys these new deliberative mechanisms asking how they work and what we can properly expect of them Much though they have to offer they cannot deliver all that deliberative democrats hope Talk Goodin concludes is good as discovery procedure but not as a decision procedure His slogan is First talk then vote Micro deliberative mechanisms should supplement not supplant representative democracy Goodin goes on to show how to adapt our thinking about those familiar institutions to take full advantage of deliberative inputs That involves rethinking who should get a say how we hold people accountable how we sequence deliberative moments and what the roles of parties and legislatures can be in that Revisioning macro democratic processes in light of the processes and promise of micro deliberation *Innovating Democracy* provides an integrated perspective on democratic theory and practice after the deliberative turn

Governance Networks in the Public Sector Erik Hans Klijn, Joop Koppenjan, Wouter Spekkink, Rianne Warsen, 2025-04-21 *Governance Networks in the Public Sector* presents a comprehensive study of governance networks and the management of complexities in network settings Public private and non profit organisations are increasingly faced with complex wicked problems when making decisions developing policies or delivering services in the public sector These activities take place in networks of interdependent actors guided by diverging and sometimes conflicting perceptions and strategies As a result these networks are dominated by cognitive strategic and institutional complexities Dealing with these complexities requires sophisticated forms of coordination network management

This book provides a conceptual framework and analytical tools to study the complexities involved in handling wicked problems in governance networks in the public sector. The book also discusses strategies and management recommendations for government business and third sector organisations operating in and governing networks. This second edition of the book is a truly revised edition incorporating recent developments in network governance theory and practice such as the influences of traditional and social media on network governance processes. The Regulation of Intelligence Activities under International Law Sophie Duroy, 2023-05-09. Presenting a thorough examination of intelligence activities in international law, Sophie Duroy provides theoretical and empirical justifications to support the cutting edge claim that states compliance with international law in intelligence matters serves their national security interests. This book theorises the regulation of intelligence activities under international law, identifying three layers of regulation: a clear legal framework governing intelligence activities, legality, a capacity to enforce state responsibility, accountability and the integration of legality and accountability into responsive regulation by the international legal order.

Research Handbook on Street-Level Bureaucracy Peter Hupe, 2019. When the objectives of public policy programmes have been formulated and decided upon, implementation seems just a matter of following instructions. However, it is underway to the realization of those objectives that public policies get their final substance and form. Crucial is what happens in and around the encounter between public officials and individual citizens at the street level of government bureaucracy. This Research Handbook addresses the state of the art while providing a systematic exploration of the theoretical and methodological issues apparent in the study of street level bureaucracy and how to deal with them.

Accountable Governance Melvin J. Dubnick, H. George Frederickson, 2014-12-18. Public accountability is a hallmark of modern democratic governance and the foundation of the popular performance management movement. Democracy is just an empty exercise if those in power cannot be held accountable in public for their acts and omissions, for their decisions, their policies and their expenditures. This book offers a finely detailed and richly informed consideration of accountability in both government and the contemporary world of governance. Twenty-five leading experts cover varying aspects of the accountability movement, including multiple and competing accountabilities, measuring accountability, accountability and democratic legitimacy, and accountability and information technology, and apply them to governments, quasi-governments, non-government organizations, governance organizations, and voluntary organizations. Together they provide the most comprehensive consideration of accountability currently available, with a blend of theoretical, empirical, and applied approaches.
