ACCOUNTING QUESTIONS & ANSWERS

EXPLAIN FINANCIAL ACCOUNTING. WHAT ARE ITS CHARACTERISTIC FEATURES?

Financial Accounting is the process in which business transactions are recorded systematically in the various books of accounts maintained by the organization in order to prepare financial statements. These financial statements are basically of two types: First is Profitability Statement or Profit and Loss Account and second is Balance Sheet.

Following are the characteristics features of Financial Accounting:

 Monetary Transactions: In financial accounting only transactions in monetary terms are considered.
Transactions not expressed in monetary terms do not find any place in financial accounting, howsoever important they may be from business point of view.

2) Historical Nature: Financial accounting considers only those transactions which are of historical nature i.e the transaction which have already taken place. No futuristic transactions find any place in financial accounting, however important they may be from business point of view.

 Legal Requirement: Financial accounting is a legal requirement. It is necessary to maintain the financial accounting and prepare financial statements there from. It is also obligatory to get these financial statements audited.

4) External Use: Financial accounting is for those people who are not part of decision making process regarding the organization like investors, customers, suppliers, financial institutions etc. Thus, it is for external use.

5) Disclosure of Financial Status: It discloses the financial status and financial performance of the business as a whole.

6) Interim Reports: Financial statements which are based on financial accounting are interim reports and cannot be the final ones.

7) Financial Accounting Process: The process of financial accounting gets affected due to the different accounting policies followed by the accountants. These accounting policies differ mainly in two areas: Valuation of inventory and Calculation of depreciation.

COMPARE FINANCIAL ACCOUNTING AND COST ACCOUNTING.

Financial Accounting protects the interests of the outsiders dealing with the organization e.g shareholders, creditors etc.
Whereas reports of Cost Accounting is used for the internal purpose by the management to enable the same in discharging various functions in a proper manner.

 Maintenance of Financial Accounting records and preparation of financial statements is a legal requirement whereas Cost Accounting is not a legal requirement.

3) Financial Accounting is concerned about the calculation of profits and state of affairs of the organization as whole whereas Cost accounting deals in cost ascertainment and calculation of profitability of the individual products, departments etc.

4) Financial Accounting considers only transactions of historical financial nature whereas Cost Accounting considers not only historical data but also future events.
