OECD

Accounting Project Caps 2014:

IRS modernization continued progress requires addressing resource management challenges : testimony before congressional committees , **Agricultural Policy Monitoring and Evaluation 2024 Innovation for Sustainable Productivity Growth** OECD,2024-11-06 This annual report monitors and evaluates agricultural policies in 54 countries including the 38 OECD countries the five non OECD EU Member States and 11 emerging economies It finds that despite some modest declines in recent years support to agriculture has remained close to recent historical highs While changes in support have been limited agricultural policies have been both reactive and proactive boosting the sector s capacity to respond to current challenges while aiming to ensure that food systems are fit for purpose as future conditions evolve This year s report focuses on policies fostering sustainable productivity growth in agriculture Governments are applying a large variety of approaches to improve productivity while preserving natural resources and reducing agricultural greenhouse gas emissions The report notes however that clearly defined targets related to sustainable productivity growth and measurable indicators of progress are important to ensure that policies achieve their stated objectives The report also notes that making more effective use of producer support to promote innovation and environmental sustainability on the farm and refocusing overall support towards targeted R D can better leverage public spending to deliver public goods and sustainable productivity growth In line with the 2022 OECD Agriculture Ministerial Declaration the report identifies a seven point policy agenda for making agriculture more sustainable productive and resilient and for improving the effectiveness and efficiency of agricultural support and markets *Joint review of the strategic plans and budget of the Internal Revenue Service, 2005* United States. Congress. Joint Committee on Taxation,2005 *The major projects report 2011* Great Britain: National Audit Office,2011-11-16 Action taken by the Ministry of Defence to balance its overall budget in the short term following the Strategic Defence and Security Review has contributed to a near 500 million in year cost increase in the 15 largest defence projects When coupled with previous cost growth these projects are now 6 billion above forecasts made when the main investment decisions were taken For the third successive year central planning decisions taken by the Department including delaying various projects have had the biggest impact on cost growth accounting for 237 million of the increase Of this 113 million relates to decisions to enhance capability Macro economic factors such as adverse foreign exchange rates accounted for 176 million of the increase Cost overruns from project specific technical issues accounted for 53 million During 2010 11 there was a total increase of 30 months with an average two months per project in the forecast time to complete these projects and bring them into service This brings the total delay on all 15 projects to 26 8 years Long term cost analysis by the NAO has shown that the difference between the approved and forecast costs of all projects which have had their main investment decision approved since 2000 is 10 6 billion an 11 4 per cent increase Additional costs have been avoided by reducing the amount of equipment the Department originally planned to buy Had the Department not reduced equipment

numbers cost growth could have been between 18.2 billion and 19.4 billion approximately 20 per cent above the approved costs

The Major Projects Report 2012 Great Britain: National Audit Office, 2013-01-10 In respect of its largest defence projects there are early signs that the Ministry of Defence has begun to make realistic trade offs between cost time technical requirements and the amount of equipment to be purchased Nevertheless the continuing variances to cost and time show the MOD needs to do consistently better This report which gives a progress review of the 16 largest defence projects shows that in the last year there has been a total forecast slippage of 139 months and increase in costs of 468 million This means that since the projects were approved costs have increased by 6.6 billion around 12 per cent more than the planned cost and the projects have been delayed by 468 months taking almost a third longer than originally expected It would be unrealistic to expect MOD and industry to identify every risk at the start of technically challenging projects However the continuing problems indicate that MOD has more to learn from historic The MOD is accepting the capability risk and some wider costs resulting from these project delays and is having to make difficult decisions about long term capabilities The MOD has made a significant investment in new and upgraded helicopters to address the shortfall identified in the NAO's 2004 report The MOD has also spent 787 million on air transport and air to air refuelling aircraft to support current operations and address capability gaps such as those caused by the previously reported delays to the A400M transport aircraft However capability gaps remain

Water Bankruptcy in the Land of Plenty Franck Poupeau, Hoshin Gupta, Aleix Serrat-Capdevila, Maria Sans-Fuentes, Susan Harris, László G. Hayde, 2017-12-21 As the American Southwest faces its deepest drought in history this book explores the provocative notion of water bankruptcy with a view towards emphasizing the diversity and complexity of water issues in this region It bridges between the narratives of growth and the strategies or policies adopted to pursue competing agendas and circumvent the inevitable A window of opportunity provided by this current long term drought may be used to induce change by dealing with threats that derive from imbalances between growth patterns and available resources the primary cause of scarcity A first of its kind this book was developed through close collaboration of a broad range of natural scientists social scientists and resource managers from Europe and United States It constitutes a collective elaboration of a transdisciplinary approach to unveiling the inner workings of how water was fought for allocated and used in the American Southwest with a focus on Arizona Specifically it offers an innovative scientific perspective that produces a critical diagnostic evaluation of water management with a particular view to identifying risks for the Tucson region that is facing continuous urban sprawl and economic growth
