Apes And Human Evolution

Charles E. Oxnard

Apes And Human Evolution:

Apes and Human Evolution Russell H. Tuttle, 2014 In this masterwork Russell H Tuttle synthesizes a vast research literature in primate evolution and behavior to explain how apes and humans evolved in relation to one another and why humans became a bipedal tool making culture inventing species distinct from other hominoids This encyclopedic volume is both a milestone in primatological research and a critique of what is known and yet to be discovered about human and ape potential

Human, Apes and Chinese Fossils Charles E. Oxnard, 1985-09-01 Human Apes and Chinese Fossils New Implications for Human Evolution The series will cover all disciplines concomitant to full University studies

Human Evolution P. J. Andrews, C. B. Stringer, 1989-09-29 The development of our ancestors is traced by fossil evidence of various ancestral groups in a survey that expands from man's earliest beginnings through the emergence of modern humans

An Ape's View of Human Evolution Peter Andrews, 2016-01-07 Our closest living relatives are the chimpanzee and bonobo We share many characteristics with them but our lineages diverged millions of years ago Who in fact was our last common ancestor Bringing together ecology evolution genetics anatomy and geology this book provides a new perspective on human evolution What can fossil apes tell us about the origins of human evolution Did the last common ancestor of apes and humans live in trees or on the ground What did it eat and how did it survive in a world full of large predators Did it look anything like living apes Andrews addresses these questions and more to reconstruct the common ancestor and its habitat Synthesising thirty five years of work on both ancient environments and fossil and modern ape anatomy this book provides unique new insights into the evolutionary processes that led to the origins of the human lineage

Evolution of Human Behavior Warren G. Kinzey, 1987-01-01 This book represents an important meeting ground in the primatology field by exploring the various primate models that have been used in the reconstruction of early human behavior While some models are based on the proposition that a key behavioral feature such as hunting eating of seeds or monogamous mating led to the evolutionary separation of apes and humans other models suggest that one primate species such as the baboon or chimpanzee best exemplifies the behavior of our early ancestors Several contributors to the book take the position that no single primate is a good model and contend instead that a model must be eclectic One of the more innovative essays suggests that ancestral behavioral states can in fact be derived by comparing the behavior of all living hominid ape and human species Additionally several other contributors analyze and discuss the concept of model making noting deficiencies in earlier models while offering suggestions for future development Although it is true that a powerful conceptual model for reconstructing hominid behavior does not yet exist The Evolution of Human Behavior Primate Models suggests ways one may be constructed based on behavioral ecology and evolutionary theory

Chimpanzees and Human Evolution Martin N. Muller, Richard W. Wrangham, David R. Pilbeam, 2017-11-27 Knowledge of wild chimpanzees has expanded dramatically This volume edited by Martin Muller Richard Wrangham and David Pilbeam brings together scientists who are leading a revolution to discover and

explain human uniqueness by studying our closest living relatives Their conclusions may transform our understanding of human evolution

Ape Into Man Sherwood Larned Washburn, Ruth E. Moore, 1974 *Tales of the Ex-Apes* Jonathan Marks, 2015-09-08

What do we think about when we think about human evolution With his characteristic wit and wisdom anthropologist Jonathan Marks explores our scientific narrative of human origins the study of evolution and examines its cultural elements and theoretical foundations In the process he situates human evolution within a general anthropological framework and presents it as a special case of kinship and mythology *Tales of the Ex Apes* argues that human evolution has incorporated the emergence of social relations and cultural histories that are unprecedented in the apes and thus cannot be reduced to purely biological properties and processes Marks shows that human evolution has involved the transformation from biological to biocultural evolution Over tens of thousands of years new social roles notably spouse father in laws and grandparents have co evolved with new technologies and symbolic meanings to produce the human species in the absence of significant biological evolution We are biocultural creatures Marks argues fully comprehensible by recourse to neither our real ape ancestry nor our imaginary cultureless biology

Ape Man Rod Caird, 1994 Explores the story of our evolution and of the people who have devoted their lives to discovering the truth about our origins *Apes and Human Evolution* Russell H. Tuttle, 2014-02-17

Russell Tuttle synthesizes a vast literature in primate evolution and behavior to explain how apes and humans evolved in relation to one another and why humans became a bipedal tool making culture inventing species distinct from other hominoids He refutes the theory that we are sophisticated instinctively aggressive and destructive killer apes
