Rethinking Disability Patrick Devlieger, Beatriz Miranda-Galarza, Steven E. Brown, Megan Strickfaden, 2016-06-15 The act of life is a lived experience common and unique that ties each of us to every other lived experience The fact of disability does not alter this fundamental truth In this edition of *Rethinking Disability World Perspectives in Culture and Society* we are presented with a system of thinking that considers the values of disability as a resource as a creative source of culture that moves disability out of the realm of victimized people and insurmountable barriers and provides opportunities to use the experience of disability to enter into networks that recognize strengths of differing abilities The authors within will intrigue you will move you will charm you but always will challenge your notion of sameness and difference as they confront the construct and de construct of disability and ableism They present compelling arguments for viewing disABILITY through the multiple lenses of disability culture They explore themes and issues that transcend past and origins time and place nuances of genetics to experiences of present and becoming and towards the future and beyond mere human yet always intrinsically connected to being human This book is intended for all audiences who dare to confront difference and sameness within themselves and in connection with others to inspire researchers who wish to explore and examine disability across social cultural and economic barriers It is an invitation to push away the barriers bring ableism inside to a place where the prosthesis is no longer the elephant in the room

The Platform Delusion Jonathan A. Knee, 2021-09-07 An investment banker and professor explains what really drives success in the tech economy Many think that they understand the secrets to the success of the biggest tech companies Facebook Amazon Apple Netflix and Google It s the platform economy or network effects or some other magical power that makes their ultimate world domination inevitable Investment banker and professor Jonathan Knee argues that the truth is much more complicated but entrepreneurs and investors can understand what makes the giants work and learn the keys to lasting success in the digital economy Knee explains what really makes the biggest tech companies work a surprisingly disparate portfolio of structural advantages buttressed by shrewd acquisitions strong management lax regulation and often encouraging the myth that they are invincible to discourage competitors By offering fresh insights into the true sources of strength and very real vulnerabilities of these companies *The Platform Delusion* shows how investors existing businesses and startups might value them compete with them and imitate them *The Platform Delusion* demystifies the success of the biggest digital companies in sectors from retail to media to software to hardware offering readers what those companies don t want everyone else to know Knee s insights are invaluable for entrepreneurs and investors in digital businesses seeking to understand what drives resilience and profitability for the long term

Ubiquitous Mapping Yoshiki Wakabayashi, Takashi Morita, 2022-07-24 Since the last decades of the twentieth century the circumstances surrounding map use and map making have drastically changed owing to advances in information and communication technologies ICTs In particular the spread of web maps and mobile devices have altered the way people interact with maps

This book features the latest works on theoretical and practical issues of these changes by terming them ubiquitous mapping. In particular, the book pays attention to not only the technological basis but also multidisciplinary human social aspects. The book covers the topics of the evaluation of ICT based technologies for context aware mapping, the theory and application of crowd sourced geospatial information and collaborative mapping, and both the positive and negative effects of ubiquitous mapping on human society. *Digital Technology and the Future of Broadcasting* John V. Pavlik, 2015-07-16. This volume presents timely discussions on how digital technology is reshaping broadcasting and the media in the United States and around the world. It features contributions from distinguished scholars and young researchers representing work that spans domestic and international issues of technological change and the implications for broadcasting and related media in a global context. Among the many issues covered are: The impact of digital technology on the structure of broadcasting organizations and regulation; The nature of broadcast content or media programming and how it is delivered at home and abroad; Engagement and interaction of the public with broadcasting and social and mobile media; and The reshaping of revenue models for broadcasters and media organizations globally. The first two parts of the volume address research challenges, issues, and advances in global broadcasting; are competitively reviewed research papers which were presented at the BEA2014 Research Symposium. The third part focuses on international perspectives with chapters from broadcasting scholars and paper discussants at the Research Symposium. This section provides reflection on the problems and prospects for research, education, and public policy that arise in this era of rapid and continuing change. As a benchmark of the remarkable changes taking place in today's media environment, the volume sets an agenda for future research on the implications of digital technology for broadcasting and broadcasting education. **Official Gazette of the United States Patent Office** USA Patent Office, 1885. *The History of the GPU - New Developments* Jon Peddie, 2023-01-01. This third book in the three part series on the History of the GPU covers the second to sixth eras of the GPU which can be found in anything that has a display or screen. The GPU is now part of supercomputers, PCs, Smartphones, and tablets, wearables, game consoles, and handhelds, TVs, and every type of vehicle including boats and planes. In the early 2000s, the number of GPU suppliers consolidated to three, whereas now the number has expanded to almost 20. In 2022, the GPU market was worth over 250 billion, with over 2.2 billion GPUs being sold just in PCs and more than 10 billion in smartphones. Understanding the power and history of these devices is not only a fascinating tale but one that will aid your understanding of some of the developments in consumer electronics, computers, new automobiles, and your fitness watch. *Journalism in the Age of Virtual Reality* John V. Pavlik, 2019-09-17. With the advent of the internet and handheld or wearable media systems that plunge the user into 360° video, augmented or virtual reality technology is changing how stories are told and created. In this book, John V. Pavlik argues that a new form of mediated communication has emerged: experiential news. Experiential media delivers not just news stories but also news experiences in which the consumer engages news as a participant or virtual

eyewitness in immersive multisensory and interactive narratives Pavlik describes and analyzes new tools and approaches that allow journalists to tell stories that go beyond text and image He delves into developing forms such as virtual reality haptic technologies interactive documentaries and drone media presenting the principles of how to design and frame a story using these techniques Pavlik warns that although experiential news can heighten user engagement and increase understanding it may also fuel the transformation of fake news into artificial realities and he discusses the standards of ethics and accuracy needed to build public trust in journalism in the age of virtual reality Journalism in the Age of Virtual Reality offers important lessons for practitioners seeking to produce quality experiential news and those interested in the ethical considerations that experiential media raise for journalism and the public **EBOOK: Marketing: The Core** KERIN,2017-01-26 EBOOK
