User's Guide for an Interactive Personal Computer Interface for the Aeroprediction Code Thomas C. Hymer, Frankie Gale Moore, 1994 This report describes interactive user friendly pre and post processing PC modules designed to operate with the latest version of the NSWC Aeroprediction Code AP93 As part of the preprocessing input module geometry inputs are now automated by giving the user many options By using this new software a set of aerodynamic coefficients can be obtained on most weapon configurations in less than 15 minutes from time of initial setup to computer outputs compared to 2 to 4 hours for the AP93 computer mainframe version While the computer cost savings are modest the AP93 executes on a large computer in less than a second the manpower savings and productivity enhancements can be significant The user's guide attempts to aid users of the AP93 by correlating AP93 PC Interface Data Inputs and the corresponding source code variable names This cross referencing information is given in italics in the discussion *Air Navigation* Octavian Thor
