Autoflight System Facundo Conforti, Currently flight automation is nearly total in commercial aircraft Automatic control systems are becoming increasingly popular in smaller and sports aircraft as well In all cases the proper functioning of an automatic flight system allows the pilot to free up attention from certain tasks and focus more on other aspects within the cockpit However it wasn't always this way The autopilot had its beginnings almost concurrently with the early days of aviation an idea that at the time seemed extremely outlandish but would forever impact the field of aviation In this work you will learn all about the principles of automatic flight system operation and its various functions using several commercial aircraft as examples Autopilot flight director automatic power control automatic navigation and many other functions make an automatic flight system a significant advantage that enhances operational safety It is the pilot's responsibility to understand all its features and learn to operate these systems as effectively as possible We will help you with that Airline Pilot. Basic Knowledge Facundo Conforti, We begin part of our aviation career flying completely solo or with an instructor assigned to a specific task As flight hours accumulate our cockpit begins to be shared with colleagues friends instructors etc But after a long path of experience the time comes to share a professional cockpit with another pilot as part of a working team This is where novice or inexperienced pilots who lack knowledge and training in a shared cockpit often face difficulties in performing routine tasks Flying in a shared cockpit not only presents a challenge for any pilot who has developed their career flying solo but also for airlines that foresee this possibility and invest resources in training pilots to bring them to the highest safety standards Considering this a pilot with knowledge and mastery of shared cockpit techniques and airline flight resources represents a competitive advantage when applying for a job with an airline as opposed to pilots who lack these tools Learning to fly in a shared cockpit as in airline operations involves getting to know your coworker forming a team where tasks can be shared roles distributed and being objective and self-critical without losing the professionalism and cordiality between colleagues Flying in an airline environment is teamwork where there will be a leader and an advisor roles that will continuously shift challenging pilots to adapt Flying for an airline is more than just flying It is about sharing assisting correcting helping cooperating and pushing together toward the same goal achieving a successful and safe flight Let us explore all the tools necessary to make our next shared cockpits a safe and professional environment where airline flight operations are more than just that Terminal Configured Vehicle Program: Test Facilities Guide Langley Research Center,1980 **Aviation Fuel Conservation Symposium** ,1984
