Bonjour New York S Lection Particuli Res:

The New York Times Index ,1981 *Neoliberalism, Cities and Education in the Global South and North* Kalervo N. Gulson, Thomas C. Pedroni, 2016-04-08 Across the world cities are being reshaped in myriad ways by neoliberal forms of globalization a process of urban restructuring with significant implications for educational policy and practices The chapters in this collection speak to two complementary but analytically distinguishable aspects of the interplay between education globalization cities and neoliberalism The first aspect relates to the macro relationships between these powerful global forces on the one hand and cities and their schools on the other In particular the book considers the stratifying dynamics that exacerbate already existing inequalities related to race ethnicity language class and gender inequalities entailing differential access to the city s various resources The second aspect deals with the cultural politics and logics of these changes in the city This recognises that globalization is not simply imposed on the city but rather becomes insinuated into its fabric through the actions and the agency of local actors and social movements Against this backdrop the chapters document how the educational politics of urban contexts in the United States India Canada South Africa and Brazil should be understood as sites in which neoliberal forms of globalization are localised reproduced and potentially contested This book was originally published as a special issue of *Discourse Studies in the Cultural Politics of Education*
