Bons Baisers Paris Tourisme Capitale:

Major French Cities facing Metropolization Alain Bourdin, 2024-05-27 This book characterizes a type of city i.e the metropolis by using characteristics which have very little to do with its size It distinguishes between metropolises and megacities and defines these different characteristics by bringing together elements related to facilities accessibility and economic power on one hand and other elements which relate more to the capacity for innovation and more generally to the knowledge society and economy All of which demonstrate the process of metropolization as well as elements of daily life and more generally elements which relate to the urban experience To live in a metropolis is not only to benefit from more urban amenities but also to live in a different way in particular in a world which is much more diverse in every respect Based on a series of metropolization criteria constructed and discussed this book goes beyond ordinary statistical approaches to integrate the interterritorial scale of metropolitan systems as well as their qualitative dimension Following in Simmel's footsteps it shows that a city is also an atmosphere a mentality a spirit all of which are poorly captured by statistical data As such the book focuses on five major themes networks economic development social issues urban form and the ecological and digital transition The book makes an interesting read for urban planners sociologists planners and architects and all specialists working in this field
