

Accounting Theory Midterm Textbook Solutions

Chapter 2:

1. Prepare the income statement for year 2 and the balance sheet at the end of year 2 for P.V. Ltd. in Example 2.1 under the assumption that P.V. Ltd. pays no dividends. 2. Show that an owner of P.V. Ltd. in Example 2.1 would not care whether P.V. Ltd. paid any dividend at the end of year 1. State precisely why this is the case. 3. Explain why expected net income is also called "accretion of discount." 4. Show that an owner of P.V. Ltd. in Example 2.2 would not care whether P.V. Ltd. paid any dividend at the end of year 1. Assume that the good-economy state was realized in year 1. 5. Two well-known models of firm value are the dividend discount model and the discounted cash flow model. Under ideal conditions, each model gives the same result. In Example 2.2, assume that P.V. Ltd. pays no dividends over its life, until a liquidating dividend is paid at the end of year 2 consisting of its cash on hand at that time. Required Verify that the market value of P.V. Ltd. at time 0 based on the expected present value of its future dividend equals \$260.33, equal to P.V.'s market value based on expected future cash flows. 6. A simple example of the difference between ideal and non-ideal conditions is the rolling of a die. Required a. Calculate the expected value of a single roll of a fair die. b. Now suppose that you are unsure whether the die is fair. How would you then calculate the expected value of a single roll? c. Continuing part b, now roll the die four times. You obtain 6, 4, 1, 3. Does this information affect your belief that the die is fair? Explain. 7. Explain why, under ideal conditions, there is no need to make estimates when calculating expected present value. 8. Explain why estimates are required to calculate expected present value when conditions are not ideal. (CGA-Canada) 9. Do you think that the market value of an oil and gas firm will be affected when RRA information is presented in addition to historical cost-based earnings from oil- and gas-producing activities? Explain why or why not. 10. Explain why, under non-ideal conditions, it is necessary to trade off relevance and reliability when estimating future cash flows. Define relevance and reliability as part of your answer. 11. Why do you think oil company managers express severe reservations about RRA? 12. The text discussion of RRA is primarily in terms of the relevance and reliability of the asset valuation of oil and gas reserves. RRA can also be evaluated in terms of the criteria for revenue recognition. Under IAS 18, revenue from the sale of goods is recognized when the significant risks and rewards of ownership have been transferred to the buyer, the Accounting Under Ideal Conditions 61 seller loses control over the items, the revenue and related costs can be measured reliably, and collection is reasonably assured. Required a. At what point in their operating cycle do most industrial and retail firms regard revenue as having been earned (i.e., realized)? Use the IAS 18 revenue recognition criteria above to explain why. b. Suppose that X Ltd. is an oil and gas producer. X Ltd. uses RRA on its books and prepares its financial statements on this basis. When (i.e., at what point in the operating cycle) is revenue recognized under RRA? Does this point meet the criteria for revenue recognition for sale of goods as given in IAS 18? Explain why or why not. 13. Inventory is another asset for which there is a variety of ways to account under historical cost accounting, including first-in, first-out; last-in, first-out; average cost; etc. Required a. How would inventory manufactured but not yet sold be accounted for under ideal conditions? In your answer, consider both balance sheet and revenue recognition approaches. b. Give reasons why inventory is usually accounted for on a historical cost basis. Is accounting on this basis completely reliable? Why? 14. A retail firm has just made a sale. However, it values its account receivable at the cost of the merchandise sold, rather than at the amount owing from the
