together it is not surprising when academic libraries find it difficult to create and manage the metadata for their ebook collections This book is written as a guide for metadata librarians other technical services librarians and ancillary library staff who manage ebook collections to help them understand the requirements for ebook metadata in their specific library context to create a vision for ebook metadata management and to develop a plan which addresses the relevant issues in metadata management at all stages of the lifecycle of ebooks in academic libraries from selection to deselection or preservation Explores the reasons behind creating records for our resources and challenges libraries to think about what that means for their context Discusses the complex nature of academic libraries and the electronic resources they require Encourages librarians to find their own way to manage metadata
