Apec And The Rise Of China:

Apec and the Rise of China Lok-sang Ho, John Wong, 2011 Annotation Intra regional trade has been rising rapidly especially after China's accession to the WTO in 2001 China's economy is expanding at a great rate and will soon surpass Japan to become the world's second largest economy This book is based on papers presented by scholars at a conference on APEC at 20 and the Rise of China

Asian Security and the Rise of China David Martin Jones, Michael Lawrence Rowan Smith, Nicholas Khoo, 2013-01-01 Khoo Jones and Smith have pulled off a remarkable balancing act crafting a well grounded and multifaceted survey of China's rise in the context of Asian security In a field which is often marked more by scholarly effervescence than substance the authors provide a refreshingly detailed portrait of the last two decades and fair minded point out evidence which might support both extremes of the debates they challenge with their own third way Frank Scott Douglas US Naval War College US Congratulations to the authors for a clearly argued and comprehensive treatment of China's post Cold War rise and what it means for existing and future dynamics of the Asia Pacific region Effectively employing realist theory in a fair minded treatment of regional developments the volume shows how and why power realities are more important than non material factors in determining the region's trajectory and thereby demonstrates that China's ascendance in Asia remains complicated and conflicted Robert Sutter George Washington University US East Asia is without question a region of huge economic political and security significance Asian Security and the Rise of China offers a comprehensive overview and assessment of the international politics of the Asia Pacific since the end of the Cold War seeking to address the overarching question of how we can most convincingly explain the central dynamics of Asia's international relations Via a realist perspective on the dynamics and frictions associated with accommodating the rise of powerful states this timely book addresses the core issue in contemporary Asian politics the rise of China The contributors expertly evaluate China's rise and the impact it has had on the dynamics of regional relations in North East and South East Asia It demonstrates that China's economic development and its regional and international ambition increasingly conflict with the existing consensus based regional arrangements like the ASEAN Regional Forum and the East Asian Summit mechanism As a consequence smaller states in the region increasingly resort to hedging and balancing strategies in an attempt to mitigate Chinese hegemony This leaves the region in the grip of a complex and potentially destabilizing security dilemma The book offers a compelling analysis of the problem that China presents for its region that will enlighten undergraduate students of regional political studies and international relations Postgraduate and Master's students on courses addressing East and South East Asia will also find plenty of information in this invaluable book

Anjum Altaf,Kaoru Nabeshima,2004 Annotation Although many economies have grown briskly in the last few years future development will depend on the quality and timeliness of policy actions This volume provides specific policy responses that could be employed to navigate successfully through periods of economic political and technological turbulence by enhancing both competitiveness of firms and the stability of the economies in East Asia China's Growth as a Regional Economic Power U.S.-China Economic and Security Review Commission,2003 Contains testimony and prepared statements by various experts as well as remarks by members of the Commission *China Rising* Yong Deng,Fei-Ling Wang,2004-12-10 Despite its increasingly secure place in the world the People's Republic of China remains dissatisfied with its global status Its growing material power has simultaneously led to both greater influence and unsettling questions about its international intentions China also has found itself in a constant struggle to balance its aspirations abroad with a daunting domestic agenda This authoritative book provides a unique exploration of the complex and dynamic motivations behind Beijing's foreign policy The authors focus on China's choices and calculations on issues such as the ruling Communist party regime's interests international status and image nationalism Taiwan human rights globalization U.S. hegemony international institutions and the war on terrorism Taken together the chapters offer a comprehensive diagnosis of the emerging paradigms in Chinese foreign policy illuminating especially China's struggle to engineer and manage its rise in light of the opportunities and perils inherent in the post cold war and post 9 11 world **Institutions and Economic Growth in Asia** Flora Huang,Horace Yeung,2018-03-20 This book explores the role of institutions in economic growth looking in particular at specific Asian
