CPIM 1994 Study Guide American Production and Inventory Control Society, 1994 *CPIM SMR Certification Exam ExamFOCUS Study Notes and Review Questions 2013* ExamREVIEW, 2012-09-21

The Certified in Production and Inventory Management CPIM certification is essential for professionals involved in Production and inventory management Operations Supply chain management Procurement Materials management Purchasing Candidates must pass all five exams for the following modules in order to earn the CPIM designation Basics of Supply Chain Management BSCM Master Planning of Resources MPR Detailed Scheduling and Planning DSP Execution and Control of Operations ECO Strategic Management of Resources SMR The CPIM exams have a lot of questions that ask for your best decisions i.e. how you will tackle a situation in a production environment In fact of the questions you will encounter in the exams a significant portion of them requires that you pick the best possible options These best options are often based on experience and best practices not easily found in the standard exam text books This ExamFOCUS Study Notes build a solid focus while revisiting key examination topics relevant to the final module SMR Whether you are just starting to study cramming at the last minute or simply looking to refresh this could prove to be a lifesaver SMR is the final module to take Is it tough Well in a sense yes It is tough because there is no fixed answer to the test questions You are asked to choose the best possible answer among all potentially OK answers Also most questions are long and with complicated scenarios to confuse you To pick up the politically correct answers you have to use your business sense to make judgment on a case by case basis I would say SMR is an advanced scenario format BSCM SMR is all about supply side management at a higher global and strategic level What is serious supply management all about Accenture has developed seven principles of supply chain management 1 Segment

customers based on their service needs 2 Design the logistics network based on service requirements 3 Listen to the signals of market demand and plan accordingly 4 Differentiate products based on actual consumer demand 5 Strategically manage the sources of supply 6 Develop a supply chain wide technology strategy 7 Adopt measures that apply to every link in the supply chain Because of advances in manufacturing and distribution the cost of developing new products and services is dropping and time to market is speeding up This has resulted in increasing customer demands local and global competition and increased pressure on the supply chain To stay competitive companies must reinvent themselves so that the supply chain sourcing and procurement production scheduling order fulfillment inventory management and customer care is no longer a cost based back office exercise but rather a flexible operation designed to effectively address today s challenges If you have been specializing in manufacturing or shop floor functions it is now the time to move yourself to a managerial position you need to see things from a broader MBA style perspective To succeed in the SMR exam you need to get yourself truly familiar with the most important information by going through sufficiently focused revision This is where we fill the gap you may think of our product as the unofficial supplement to the regular training class or you may view it as a standalone module with a focus on building up your exam readiness As an effective learning aid implemented in the format of study notes the ExamFOCUS Study Notes package is designed to present information in an easy to understand conversational format Notes are well written technically accurate and completely representative of the key information covered by the exam
