

APICS CPIM Part 2 Final Study Guide Questions with Correct Answers -Graded A.

Distribution requirements planning (DRP) provides transportation planners with:

Answers

locations for scheduling deliveries.

backhauling information.

load optimization information.

current and future shipping requirements. - Rationale

DRP can convert the schedule of planned orders into transportation data elements such as weight, volume, and number of pallets.

current and future shipping requirements.

Which is a decision at the operations strategy level related to planning and controlling the delivery of products and services?

Answers

Should the operation develop its products or services in house or outsource the design?

What should be the size of the workforce and how much subcontracting should be used?

How should operations adjust its activity levels in response to demand fluctuations?

What aggregate levels of inventory should be maintained? - Rationale

Operational strategies address detailed day-to-day planning. The adjustment of activity levels is one example of an operational decision related to planning and controlling the delivery of products and services. The other answer choices either relate to other areas of the operational plan or are tactical (more long-term) decisions.

How should operations adjust its activity levels in response to demand fluctuations?

Which helps set boundaries around the type of work the company will pursue and indicates what is out of scope?
