Debunk It! Fake News Edition John Grant, 2019-09-03 We live in an era of misinformation much of it spread by authority figures including politicians religious leaders broadcasters and of course apps and websites In this second edition author John Grant uses ripped from the headlines examples to clearly explain how to identify bad evidence and poor arguments He also points out the rhetorical tricks people use when attempting to pull the wool over our eyes and offers advice about how to take these unscrupulous pundits down Updated to include a chapter on fake news Debunk It serves as a guide to critical thinking for young readers looking to find some clarity in a confusing world

Denying Science John Grant, 2011-10-04 Is global warming just scaremongering by climatologists conspiring to protect their jobs Is evolution just a theory Is autism caused by vaccinations The answer to all of these questions is of course no The scientific evidence is now in and it is conclusive on these and many more issues that are fundamental to our knowledge and wellbeing But you'd never know this if all of your information came from the popular media or your upbringing and immediate circle of influence didn't include critical thinking and basic scientific literacy As this witty book with a very serious message shows our culture has in recent decades been characterized by a widespread antagonism toward science and the not always welcome messages it brings Large sections of the supposedly sophisticated populations in the developed nations are in an active state of denial Not only do they deny scientific evidence but they also call into question the very competence of science as a descriptor of reality In short they deny reality The author surveys the gamut of clearly unscientific ideas concerning the food we eat the medicines and potions we are either afraid of or advised to take our sex preferences and a host of other issues that are raised by various panics urban legends and a general climate of misinformation He also examines how special interests from agribusiness to pharmaceutical companies to creationists actively work to distort or suppress scientific findings While the tendency may be to laugh at some of the ridiculous notions catalogued in the author's overview of bogus ideas the overall picture he creates is anything but funny This book reminds the reader that the future of free increasingly complex societies depends on an educated citizenry that is able to think clearly and critically based on reliable information

**The Global Mind and the Rise of Civilization** Carl Johan Calleman, 2016-05-17 How the global mind drives the evolution of both consciousness and civilization Explains how our brains receive consciousness from the global mind which upgrades human consciousness according to a pre set divine time frame Reveals how the Mayan Calendar provides a blueprint for these consciousness downloads throughout history Examines the mind shift in humans and the development of pyramids and civilization in ancient Egypt Sumer South America and Asia beginning in 3115 BCE In each culture the origins of civilization can be tied to the arising of one concept in the human mind straight lines Straight and perpendicular lines are not found in nature so where did they come from What shift in consciousness occurred around the

globe that triggered the start of rectangular building methods and linear organization as well as written language pyramid construction mathematics and art Offering a detailed answer to this question Carl Calleman explores the quantum evolution of the global mind and its holographic resonance with the human mind He examines how our brains are not thinking machines but individual receivers of consciousness from the global mind which creates holographic downloads to adjust human consciousness to new cosmological circumstances He explains how the Mayan Calendar provides a blueprint for these downloads throughout history and how the global mind rather than the individual has the power to make civilizations rise and fall He shows how at the beginning of the Mayan 6th Wave Long Count in 3115 BCE the global mind gave human beings the capacity to conceptualize spatial relations in terms of straight and perpendicular lines initiating the building of pyramids and megaliths around the world and leading to the rise of modern civilization He examines the symbolism within the Great Pyramid of Giza and the pyramid at Chich n Itz and looks at the differences between humans of the 6th Wave in ancient Egypt Sumer South America and Asia and the cave painters of the 5th Wave He reveals how the global mind is always connected to the inner core of the Earth and discusses how the two halves of the brain parallel the civilizations of the East and West Outlining the historical psychological geophysical and neurological roots of the modern human mind Calleman shows how studying early civilizations offers a means of understanding the evolution of consciousness **Debunk It!** John Grant,2015-02-24 A guide to critical thinking for young readers looking to find some clarity in a confusing world

Toner,2024-08-06 Written for pre teens and young teens in lively text accompanied by fun facts True or False The Science of Perception Misinformation and Disinformation explores what psychology tells us about

development and persistence of false perceptions and beliefs and the difficulty of correcting them plus ways to debunk misinformation and think critically and factually about the world around us This book explores how we think and perceive and why false beliefs superstitions opinions misinformation or wild guesses can just stick around and mess things up You ll see how misunderstandings and misuse of scientific findings can lead people to the wrong conclusions Readers learn how to outsmart their brain to gain critical thinking skills and find ways to identify and correct false beliefs and disinformation Our big brains are super efficient but glitchy Scientists estimate that 90% of what we see hear smell or sense never really sinks in Instead we pick up on the big things general impressions or important stuff and end up leaving our brains to fill in the missing info And on top of that people sometimes twist information on purpose False beliefs can be shared from person to person or go viral in a flash often by people who think the info is true So how in the world do we know what s real what s true or who to believe Dig in and get the facts
