Name: _____ Date: _____

The islands of Lake Geometria are shown below. A cabin is marked on each island. The scale, using units called *stades*, is shown in the lower right. A stade measured about 600 feet, so Lake Geometria is not very big. Use the grid to help you answer the following questions. All island measurements should be made *from cabin to cabin*.

1. What is the distance in stades from Euclides to Archimedes? Describe how you found your answer.
2. What is the distance in stades from Thales to Euclid? Describe how you found your answer.
