discusses a range of issues that must be explicitly addressed if we are to make headway in developing a sustainable and productive relationship between research policy and practice The authors make it clear that the politics policies institutional practices market systems and social dynamics currently at play in education have a tendency to derail the idealised pathway from research to reform This book aims to move the discussion towards alternative and potentially more fruitful ways of linking research with practice Reframing Educational Research is an invitation to all researchers to identify new opportunities for advancing theory and practice in education It is a must read for all practitioners and researchers in education
