

Let's start building numbers! Just as building skyscrapers is a visual representation of mathematics, students will use the visual representation of base-ten blocks to add—or build—onto a two-digit number.

Learning Objectives

Students will be able to add two-digit numbers using both actual and written base-ten blocks.

Materials and preparation

- Group sets of base-ten blocks
- Class set of whiteboards and dry erase markers
- Class set of the [Count and Add Blocks](#) worksheet
- [Shopping with Daddy](#) worksheet (optional)

Key terms

- base-ten blocks
- two-digit
- place value chart

Attachments

- [Count and Add Blocks \(PDF\)](#)
- [Shopping with Daddy \(PDF\)](#)

Introduction (5 minutes)

- Practice counting by tens as a class. As you count, hold up the base-ten rods so that, at the end, you will be holding 10 rods to equal 100.
- Show on the board how adding 10 over and over is counting up and building bigger numbers.
- Call on students quickly and have them solve problems in which they add 10 every time ($50 + 10$, $30 + 10$, $10 + 10$).
- Say, "Base-ten blocks help us have a visual of what we are adding, especially when we are adding larger two-digit numbers."

EL

Beginning

- Ask students how many fingers they have, and count 10 fingers together chorally. Next, have 10 students flash 10 fingers as you count together by tens to 100.

Intermediate

- Display a hundreds chart as a visual reference as students solve problems of 10 more.

Explicit Instruction/Teacher modeling (10 minutes)

- Read the student objective and define the key words with the students—**two-digit numbers** (one whole number in both the ones and tens place) and **base-ten blocks** (a manipulative used to teach math).
