Collaborating for Real Literacy Sharon M. Pitcher, Bonnie Mackey, 2013-03-21 Advances in literacy require collaboration between all of a school's stakeholders. This book harnesses the latest research and takes into consideration CCSS to show how to make that collaboration a reality. Authentic literacy practice is crucial to preparing all students to be successful both in the workplace and college in the 21st century. Insisting that this literacy achievement will only happen when librarians, teachers, literacy coaches, and administrators work together in their schools. *Collaborating for Real Literacy* addresses the role of each instructional leader individually and examines the importance of the group collectively in bolstering the literacy of all students. Practical ways to support the teaching of the Common Core State Standards (CCSS) are infused throughout every chapter. In this second edition of the book, core chapters on scaffolding literacy centers, family literacy, English language learners, comprehension, assessment, writing, and discussion have been updated based on current research and CCSS. Each of these chapters now offers suggestions for literacy coaches. Also new are recommendations for grades K-5 and 6-12 demonstrating specific ways to apply instructional ideas to different age levels and providing materials that can be used for the instruction. Additionally, three new chapters have been added with real literacy instructional ideas for content area reading and Response to Intervention support for struggling readers.

Acquiring and Organizing Curriculum Materials Gary Lare, 1997-11-06 *Acquiring and Organizing Curriculum Materials* addresses two areas of need in a curriculum materials center: where to find curriculum materials for acquisition and how to organize these materials for efficient and effective access once they are acquired. This book brings together in one convenient source many companies, associations, projects, and government agencies that publish, produce, and distribute curriculum materials such as curriculum guides, textbooks, teaching activities, books, and AV media instructional materials. Lare has also included a list of World Wide Web sites and links that provide teaching activities and lesson plans, curriculum guides, and standards and curriculum resource links which provide content to support lesson plans. Once the materials are acquired, various shelving options and classification schemes are presented so that informed decisions can be made regarding how to organize the various collections. A useful resource for curriculum materials librarians in academic libraries, school library media specialists, public librarians responsible for education collections, and for library and information science courses in collection development and organization.
