Peace, War, and Computers Chris Hables Gray, 2005 Computers are at the heart of war today but even the best missile defense system envisioned by the military would have been useless against box cutters on September 11 Creator of the cult classic Cyborg Handbook and author of Cyborg Citizen hailed by Wired magazine as a ripping good yarn Chris Hables Gray argues that rapid technological development is the order of the day and our future will be determined by who uses it and for what terror or peace A visionary and disarming overview of cyberwar in the twenty first century Peace War and Computers looks beyond the gadgets of techno warfare and the early predictions of a purely cyberspace war to reveal how electronic culture has changed the way we wage war and strive for peace Unmanned aircraft soon to be followed by remote control naval fleets may appear to make warfare more sterile less bloody But as the fighting in Iraq has shown superior technology does not guarantee quick or bloodless victories Essential reading for anyone interested in computers politics and the cutting edge of military strategy and theory Peace War and Computers unlocks the power and pitfalls of computers for war and peace in a world where total war is as unthinkable as apocalyptic war is possible Book jacket

Hamer,2020-04-19 Sex is love s fast forward button If you re normal sooner or later you re going to fall in love with the person you re sleeping with or they re going to fall in love with you whether you like it or not Passionate love as Jonathan Haidt rightly observes in *The Happiness Hypothesis* 2006 is a drug Its symptoms overlap with those of heroin and cocaine Passionate love alters the activity of several parts of the brain including parts that are involved in the release of dopamine Any experience that feels intensely good releases dopamine and the dopamine link is crucial here because drugs that artificially raise dopamine levels as do heroin and cocaine put you at risk of addiction The feelings we develop for someone we re sleeping with are powerful This is largely a function of oxytocin a hormone normally associated with mother infant bonding In most mammals oxytocin is released solely during breastfeeding where it helps to forge a powerful bond between mother and child But in certain species large quantities of oxytocin are also released during sex where it helps to forge a powerful bond between lovers In *Blueprint* 2019 Nicholas A Christakis maintains that these modifications of the oxytocin reflex are nothing short of astounding a set of physiological experiences that originally evolved to facilitate mother child bonding have in our species evolved to facilitate and support pair bonding The neural circuits that light up in a woman s brain are similar whether she looks at her baby or her partner Evolution seems to have selected for human neediness This explains the voracious nature of human sexuality Unlike tigers bears and salamanders who only have sex during the mating season we have sex all year round What s more we have a great deal of sex that s clearly not going to result in pregnancy e g

gay sex straight sex after menopause etc Sex s primary purpose has long since transcended procreation Sexual desire renders us needy It takes us out of ourselves and into the world making hunters of us all If the greatest friendships fall into our laps serendipitously like the treasure you find buried in your own backyard the greatest loves of our lives are like spoils we bring home from the field of battle *Considerations Respecting the Recognition of Friends in Another World* John Redman Coxe, 1845 **Footfalls on the Boundary of Another World, with Narrative Illustrations. From the 10. American Ed. with Emendations and Add** Robert Dale Owen, 1860
