Cascadia's Fault Jerry Thompson, 2012-03-10 A thrillingly rendered and level headed look at the Cascadia Subduction Zone the cause of over 30 monster earthquakes and the devastating natural disasters it promises There is a crack in the earth s crust that runs roughly 31 miles offshore approximately 683 miles from Northern California up through Vancouver Island off the coast of British Columbia The Cascadia Subduction Zone has generated massive earthquakes over and over again throughout geologic time at least 36 major events in the last 10 000 years This fault generates a monster earthquake about every 500 years And the monster is due to return at any time It could happen 200 years from now or it could be tonight The Cascadia Subduction Zone is virtually identical to the offshore fault that wrecked Sumatra in 2004 It will generate the same earthquake we saw in Sumatra at magnitude nine or higher sending crippling shockwaves across a far wider area than any California quake Slamming into Sacramento Portland Seattle Victoria and Vancouver it will send tidal waves to the shores of Australia New Zealand and Japan damaging the economies of the Pacific Rim countries and their trading partners for years to come In light

of recent massive quakes in Haiti Chile and Mexico Cascadia s Fault not only tells the story of this potentially devastating earthquake and the tsunamis it will spawn it also warns us about an impending crisis almost unprecedented in modern history **U.S. Geological Survey Professional Paper** ,1973 *Geological Survey Professional Paper* Geological Survey (U.S.),1949 **Earth Science** ,2001 **Geothermal Energy** United States.
