Adesso l'architettura Jacques Derrida, 2008 *Psychoanalysis and Architecture* Cosimo Schinaia, 2018-05-08 This book explores how psychoanalysis and architecture can enhance and increase the chances of mental containment while also fostering exchange between inside and outside The way in which psychoanalysts take care of mental suffering and the way in which architects and city planners assess the environment are grounded in a shared concern with the notion of dwelling It is a matter of fact that dwelling exists in a complex context comprised of both biological need and symbolic function Psychoanalysis and architecture can work together in both thinking about and designing not only our homes but also the analyst s consulting rooms and more generally our therapy places However this is possible only if they renounce the current limited and restrictive model of this interaction and propose one more that is more in harmony with the questions and situations that clients themselves pose

The Art of the City Raffaele Milani, 2017-12-12 In *The Art of the City* Raffaele Milani reflects on the ways in which inhabitants of the cityscape have interacted on a spiritual psychological and philosophical level with the architecture that surrounds them Working with the premise that the city has a soul which is externalized in the physical structures of its urban space Milani expresses alarm in the face of sprawling megacities that typify the postmodern age and endanger the survival of cities distinctiveness While he laments that the nature surrounding cities is disappearing under concrete his concern is counterbalanced by the realization that there are ongoing projects of urban reclamation renewal and reutilization aimed at preserving an ancient almost mystical rapport between the citizen and the lived space Milani illustrates his argument by citing the works of modern architects including Emilio Ambasz Massimiliano Fuksas Frank Gehry Rem Koolhaas Kisho Kurokawa Daniel Libeskind and Renzo Piano Rather than a history of architecture *The Art of the City* is a compelling and timely reflection on the important challenge of insuring the continued liveability and aesthetic valorization of public spaces

Pensare l'architettura. Sapere filosofico e fare architettonico Rocco Pititto, 2017-03-20 Filosofia e architettura costituiscono un unico sapere in funzione del benessere dell'uomo Parlare pensare fare avere delle emozioni sono dimensioni dell'esistenza umana La filosofia ha bisogno dell'architettura ma anche questa ha bisogno della filosofia La costruzione di un ambiente per l'uomo se opera dell'architetto lo soltanto perch dietro ogni artefatto c'è un'idea che trova la sua forma e la sua realizzazione in un progetto Il fare architettonico si lega al sapere filosofico quasi ad affermare che nella figura dell'architetto conviva anche quella del filosofo La filosofia dà all'architettura il fondamento che si costituisce come regola e misura di un'attività tesa a costruire un mondo più umano Dentro questo quadro sono qui riproposti dei percorsi narrativi che vedono l'uomo in relazione con alcuni degli artefatti dell'architettura Sono artefatti che hanno una incidenza nella vita degli individui perch in essi che gli uomini vivono e sperimentano la loro condizione umana il loro patire e il loro sperare La casa come la dimora più originaria dell'essere dell'uomo a difesa della sua sopravvivenza lo spazio sacro con la riscoperta del divino nell'uomo nell'epoca del disincanto la città degli uomini con le sue

narrazioni e le sue utopie mancate la biblioteca con la richiesta di una maggiore cultura nel tempo nella crisi della contemporaneità sono alcuni di questi artefatti più rappresentativi rispetto ad altri oggetti di racconto. Sono artefatti che disegnano il perimetro entro cui l'essere dell'uomo fa esperienza di sé con i problemi e le difficoltà dell'esistenza ma anche con le sue aspettative, i suoi desideri e i suoi sogni.

Meaning in Architecture, now Carlo Deregibus, Aurora Alison, 2024-10-15

The connection between form and meaning has been so intrinsic and obvious that it has been implicit for centuries. Then around fifty years ago the issue of meaning suddenly burst into the architectural world with many scholars and practitioners bustling to introduce semiology and semiotics into design. Now after the globalisation and the atomisation of thoughts of the last decades those debates could seem pretty meaningless, the form being mainly an aesthetic feature or a counterfeit fetish for ever-changing feeble poetics. Yet we continue to design, produce and critique architecture attributing meanings, intentions and hopes to its forms. Once more we will explore and discuss the elusive yet unavoidable connection between meaning and architecture in four thematic sections to understand the place and dimension of meaning in of, from, to, after or maybe even for Architecture.

L'Architettura italiana, 1913 **Unidentified Flying Object for Contemporary Architecture** Beatrice Lampariello, Andrea Anselmo, Boris Hamzeian, 2022-10-18

The first monographic publication focused on the Florentine UFO group 1968-1978 that conducts a historical analysis of its work, reveals its close relationship with the contemporary artistic, literary and architectural avant-garde and finally investigates its legacy for the contemporary project. The contemporary context is defined by a unique conjuncture. On one hand we witness the revival of the Radical Architecture that from the avant-garde experiments of the origins recovers creative processes and iconographic fragments while nullifying the original ideological and political values. On the other hand we see social protests in defense of fundamental rights of democracy as in 1968. With these premises Architecture is now reinvestigating those ephemeral experiments that have endured half a century as new stone monuments capable of indicating new perspectives for both research and design. Placing UFO group one of the authors of those still poorly known monuments at the core of the contemporary debate means investigating their formal and seductive aspects but also the ideological, political and social values with which objects, installations and happenings have been innervated, transforming them into devices of an architecture nourished by literature, art and political commitment for the foundation of an eloquent and activist project even more radical than the well-known Superstudio and Archizoom. The collaboration between Beatrice Lampariello, an architecture historian specialized in the 1960s and 1970s, and False Mirror Office, a group of historians and designers engaged in the rediscovery of UFO group, led to a monograph focused on the UFO's work and an evaluation of their legacy relative to contemporary architecture. This monograph is composed of three sections:

- 1 History: a first ever study of UFO by False Mirror Office via analysis of all archival and bibliographic sources as well as a series of interviews with UFO members and a collection of its writings published and unpublished for the first time, translated into English.
- 2 Context: composed of essays by historians and architectural theorists Beatrice Lampariello, Simon Sadler, Anna

The School of Mathematics at Rome's University Campus Simona Salvo, 2022-09-28 The School of Mathematics is a masterpiece of the early 1930s by Gio Ponti who is today regarded as a master of Italian Modernism Although World War II bombings shattered the coloured stained glass window that once adorned the balanced and harmonious white travertine facade the building remains a striking and significant piece of architecture Although it underwent a series of transformations over the years before its historical and artistic relevance was recognised it can still be appreciated and admired for its magnificent expressivity Its uniqueness derives from its complexity such as is often found in Italian monuments of all ages a rare synthesis of urban design architecture art industrial design historical archives and perhaps the first of its kind scientific production in the field of mathematics This illustrated report is a synopsis of the extensive technical research documents produced by the research team for each step of the work It is also a premise for the conservation management plan proposed at the end of the full report As in any area of science knowledge is at the basis of future action we need to understand today how to take care of the historical buildings of our campus tomorrow buildings recognised worldwide as architectural and historical monuments

Ora questo è perduto Francesca Belloni, 2017-05-10 Ripercorrendo la storia della trattatistica da Vitruvio fino al periodo illuminista per approdare al dibattito tipologico italiano degli anni Sessanta e Settanta si tenta qui di far luce su alcuni indispensabili strumenti critici per indagare il tema del rapporto tra tradizione e moderno rapporto che nello specifico implica la definizione stessa di che cosa sia l'architettura e su cosa si costruisca il sapere architettonico in relazione alla nozione di tipo e allo studio della tipologia Sebbene le differenti interpretazioni e il presunto ruolo operativo degli studi tipologici possano sembrare privi di una immediata attualità se non addirittura ridotti a una consuetudine accademica si ritiene infatti ancora utile interrogarsi sul ruolo che essi hanno avuto e possono tuttora avere in relazione alla pratica architettonica e agli obiettivi dell'insegnamento Ci soprattutto in vista di una lettura critica capace di stabilire il valore degli strumenti utilizzati di fronte alla condizione dispersa della città contemporanea
