Emerging Vectors of Narratology Per Krogh Hansen, John Pier, Philippe Roussin, Wolf Schmid, 2017-08-07 Narratology has been flourishing in recent years thanks to investigations into a broad spectrum of narratives at the same time diversifying its theoretical and disciplinary scope as it has sought to specify the status of narrative within both society and scientific research. The diverse endeavors engendered by this situation have brought narrative to the forefront of the social and human sciences and have generated new synergies in the research environment. *Emerging Vectors of Narratology* brings together 27 state-of-the-art contributions by an international panel of authors that provide insight into the wealth of new developments in the field. The book consists of two sections. Contexts includes articles that reframe and refine such topics as the implied author, narrative causation and transmedial forms of narrative; it also investigates various historical and cultural aspects of narrative from the narratological perspective. Openings expands on these and other questions by addressing the narrative turn, cognitive issues, narrative complexity and metatheoretical matters. The book is intended for narratologists as well as for readers in the social and human sciences for whom narrative has become a crucial matrix of inquiry. American Doctoral Dissertations, 2001 Index to American Doctoral Dissertations, 1960 *Music as Discourse* Victor Kofi Agawu, 2009 The question of whether music has meaning has been the subject of sustained debate ever since music became a subject of academic inquiry. This book presents a synthetic and innovative approach to musical meaning which argues deftly for the thinking of music as a discourse in itself. *Government Reports Announcements & Index*, 1982 Tolstoy Studies Journal, 2002 *Bulletin of the Atomic Scientists*, 1969-02 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world. Aeronautical Engineering, 1993 A selection of annotated references to unclassified reports and journal articles that were introduced into the NASA scientific and technical information system and announced in Scientific and technical aerospace reports STAR and International aerospace abstracts IAA. *ACS Directory of Graduate Research 1993* American Chemical Society. Committee on Professional Training, 1993 Comprehensive Dissertation Index, 1984
