Customized Ob/Gyn Management for Diverse Populations Gloria Bachmann, Juana Hutchinson-Colas, 2024-10-29

Customized Ob Gyn Management for Diverse Populations provides tailored options of management for optimal clinical care of the major preventive and interventive Ob Gyn issues. Case scenarios highlight and discuss the need for customized care and inclusive protocols that depend on each woman's race, gender, sexual orientation, culture, and socioeconomic factors. As health disparities adversely affect groups of people who have systematically experienced greater social and economic obstacles to health based on their racial or ethnic group, socioeconomic status, gender, sexual orientation, or other characteristics historically linked to discrimination or exclusion, this book provides a welcomed resource. The book highlights the fact that in order to change the current scenario, the health care community needs more information and awareness of health care data regarding diverse groups, population health, and well-being. Provides a framework for patient care based on the Robert Wood Johnson Foundation's Culture of Care, moving cultural aspects of medical care into health delivery. Discusses tailored options of management for the optimal clinical care of diverse populations. Presents case studies that discuss the same problem in various women from different races, backgrounds, cultures, and sexual orientation. *Medical Documentation, Billing, and Coding for the Advanced Practice Nurse* Carol Berger, Theresa Galakatos, Nina A.

Zimmermann, 2025-01-30. Written specifically for student and new nurse practitioners, this guide presents the essentials of how to document code bill and get reimbursed for services provided in practice. Coding is a core skill that requires practice, and a nurse practitioner is responsible for the accuracy of codes submitted on a claim form. This book covers the context and background for billing and coding, how to document correctly, the 2021-2023 evaluation and management coding changes, specialty services, the legal implications of coding and medical necessity. Using a read-it-see-it-do-it approach as a learning strategy, the book includes case studies from a range of inpatient and outpatient settings and practice exercises to try out your skills. Resources linked to updates on billing and coding rules are provided as an appendix to ensure the content can be applicable long term. This text is an invaluable resource for students and nurse practitioners new to coding and billing.

The New Face of Evaluation and Management Kellie Hall, 2025-06-30. Physicians want to care for patients, not spend their time documenting in an electronic medical record. Physicians are always complaining about the amount of time they spend documenting patient care in support of medical billing through an evaluation and management coding system. E/M New guidelines were created to lessen the time a physician provider spends on documentation as many of the mandatory elements are no longer a requirement for calculating a code level. Previously, an E/M evaluation and management note required documentation of history, exam, and medical decision making with required elements in each component to support a level for payment. If an element was missing, the level of service was not supported; therefore, the code was lowered, resulting in a lower reimbursement for the physician provider. The new guidelines eliminated the requirement of History and Exam as part

of the calculation of a code level Yes an appropriate history and exam are required this supports good patient care but when it comes to reimbursement they are no longer part of the picture The overall system is not difficult if time is taken to understand the elements and how they are applied in the documentation Documentation is a word game always has been the authors focus is to show what words to use to lessen the time but still convey the complexity of the patient s condition and how the physician provider determines a treatment plan which includes the risk to the patient to satisfy the Coding guidelines initiated by Medicare and American Medical Association This book evaluates the new guidelines and brings them into prospective so physicians providers coders can easily understand how to document and calculate the level of service for reimbursement This is not a cumbersome book or complicated but straight to the point The main goal of the book is to educate physicians nurses and coders on what documentation is really required and what has just become habit over the last 30 years
