A Scientific Autobiography Oppositions S:

A Scientific Autobiography, reissue Aldo Rossi, 2010-01-29 A lyrical memoir by one of the major figures of postmodernist architecture with drawings of architectural projects prepared especially for the book This revealing memoir by Aldo Rossi 1937 1997 one of the most visible and controversial figures ever on the international architecture scene intermingles discussions of Rossi's architectural projects including the major literary and artistic influences on his work with his personal history Drawn from notebooks Rossi kept beginning in 1971 these ruminations and reflections range from his obsession with theater to his concept of architecture as ritual IAUS, the Institute for Architecture and Urban Studies Suzanne Frank, Suzanne Shulof Frank, 2010 The book is a combined memoir and impressionistic history of the Institute for Architecture and Urban Studies At first affiliated with New York's Museum of Modern Art and Cornell University the Institute housed architects artists and historians who worked on creative design and intellectual projects and would become world renown Its creation and direction was in the hands of its able leader Peter Eisenman Besides a documentary study of the work that went on there among an international clearing house the book is laced with impressions of the author's experience there It has been in the works for over 12 years and was originally financed by the Graham Foundation for the Study of the Fine Arts and has subsequently been aided by Dr Jenny Kaufmann The photographs of the Institute at the height of its activity are included and so does an original ground plan of its West 40th Street office done by Scott Brandi who also designed the book It ends with 27 interviews of prominent members of the Institute who comment on it and their experiences The book should appeal to architecture students and those interested in architecture and urbanism of the seventies when the government in the United States was more reasonable in economic and political equity Cinematic Aided Design François Penz, 2017-08-14 Cinematic Aided Design An Everyday Life Approach to Architecture provides architects planners designer practitioners politicians and decision makers with a new awareness of the practice of everyday life through the medium of film This novel approach will also appeal to film scholars and film practitioners with an interest in spatial and architectural issues as well as researchers from cultural studies in the field of everyday life The everyday life is one of the hardest things to uncover since by its very nature it remains overlooked and ignored However cinema has over the last 120 years represented interpreted and portrayed hundreds of thousands of everyday life situations taking place in a wide range of dwellings streets and cities Film constitutes the most comprehensive lived in building data in existence Cinema created a comprehensive encyclopedia of architectural spaces and building elements It has exposed large fragments of our everyday life and everyday environment that this book is aiming to reveal and reconstitute *Getty Research Journal, No. 11* Gail Feigenbaum, 2019-03-05 The Getty Research Journal features the work of art historians museum curators and conservators from around the world as part of the Getty's mission to promote the presentation conservation and interpretation of the world's artistic legacy Articles present original scholarship related to the Getty's collections initiatives and research This issue features essays on the

culture of display in eighteenth century Venetian palaces the influence of prehistoric cave paintings on American abstract artists the life and writings of Pauline Gibling Schindler an unrealized project by Sam Francis and Walter Hopps for a contemporary art venue in 1960s Los Angeles Harald Szeemann's early plans for the documenta 5 exhibition and the notebooks and manuscripts that led to Aldo Rossi's Scientific Autobiography Shorter texts include notices on Felipe Guaman Poma de Ayala's illustrations accompanying a tale in Mart n de Mur a's Historia general del Piru copperplate prints depicting the Qing army's invasion of Nepal in 1792 the Nazi era business records of the Gustav Cramer gallery in The Hague Netherlands and a proposal for the integration of provenance research into all aspects of museum activities including a call for cross institutional databases and international collaborations

Oppositions and Paradoxes John L. Bell, 2016-04-18

Since antiquity opposed concepts such as the One and the Many the Finite and the Infinite and the Absolute and the Relative have been a driving force in philosophical scientific and mathematical thought Yet they have also given rise to perplexing problems and conceptual paradoxes which continue to haunt scientists and philosophers In Oppositions and Paradoxes John L. Bell explains and investigates the paradoxes and puzzles that arise out of conceptual oppositions in physics and mathematics In the process Bell not only motivates abstract conceptual thinking about the paradoxes at issue but he also offers a compelling introduction to central ideas in such otherwise difficult topics as non Euclidean geometry relativity and quantum physics These paradoxes are often as fun as they are flabbergasting Consider for example the famous Tristram Shandy paradox an immortal man composing an autobiography so slowly as to require a year of writing to describe each day of his life he would if he had infinite time presumably never complete the work although no individual part of it would remain unwritten Or think of an office mailbox labelled mail for those with no mailbox if this is a person's mailbox how can they possibly have no mailbox These and many other paradoxes straddle the boundary between physics and metaphysics and demonstrate the hidden difficulty in many of our most basic concepts

The History and Poetics of Scientific

Biography Thomas Söderqvist, 2016-03-03 Biographies of scientists carry an increasingly prominent role in today's publishing climate Traditional historical and sociological accounts of science are complemented by narratives that emphasize the importance of the scientific subject in the production of science Not least is the realization that the role of science in culture is much more accessible when presented through the lives of its practitioners Taken as a genre such biographies play an important role in the public understanding of science In recent years there has been an increasing number of monographs and collections about biography in general and literary biography in particular However biographies of scientists engineers and medical doctors have rarely been the topic of scholarly inquiry As such this volume of essays will be welcomed by those interested in the genre of science biography and who wish to re-examine its history foundational problems and theoretical implications Borrowing approaches and methods from cultural studies and the history philosophy and sociology of science the contributions cover a broad range of subjects periods and locations By presenting such a rich diversity of essays the

volume is able to chart the reoccurring conceptual problems and devices that have influenced scientific biographies from classical antiquity to the present day In so doing it provides a compelling overview of the history of the genre suggesting that the different valuations given scientific biography over time have been largely fuelled by vested professional interests **An**

Architect's Guide to Fame Paul Davies,Torsten Schmiedeknecht,2006-08-11 This lively text provides a candid inquiry into the contemporary means by which architects get work and for better or worse become famous In response to the reciprocal relationship between publicity and everyday architectural practice this book examines the mechanisms by which architects seek publicity and manage to establish themselves and their work ahead of their colleagues Through the essays of specialist contributors this book enables the reader to understand the complex relationship between what they see as the built environment and the unwritten stories behind how it came about **The Imperfect City: On Architectural Judgment**

Professor Samir Younés,2012-09-01 If architectural judgment were a city a city of ideas and forms then it is a very imperfect city When architects judge the success or failure of a building the range of ways and criteria which can be used for this evaluation causes many contentious and discordant arguments Proposing that the increase in number and intensity of such arguments threatens to destabilize the very grounds upon which judgment is supposed to rest this book examines architectural judgment in its historical cultural political and psychological dimensions and their convergence on that most expressive part of architecture namely architectural character It stresses the value of reasoned judgment in justifying architectural form a judgment based on three sets of criteria those criteria that are external to architecture those that are internal to architecture and those that pertain to the psychology of the architect as image maker External criteria include philosophies of history or theories of modernity internal criteria include architectural character and architectural composition while the psychological criteria pertain to mimetic rivalry or rivaling desires for the same architectural forms Yet although architectural conflicts can adversely influence judgment they can at the same time contribute to the advancement of architectural culture **Subtle is the Lord** Abraham Pais,2005-08-25 Subtle is the Lord is widely recognized as the

definitive scientific biography of Albert Einstein The late Abraham Pais was a distinguished physicist turned historian who knew Einstein both professionally and personally in the last years of his life His biography combines a profound understanding of Einstein s work with personal recollections from their years of acquaintance illuminating the man through the development of his scientific thought Pais examines the formulation of Einstein s theories of relativity his work on Brownian motion and his response to quantum theory with authority and precision The profound transformation Einstein s ideas effected on the physics of the turn of the century is here laid out for the serious reader Pais also fills many gaps in what we know of Einstein s life his interest in philosophy his concern with Jewish destiny and his opinions of great figures from Newton to Freud This remarkable volume written by a physicist who mingled in Einstein s scientific circle forms a timeless and classic biography of the towering figure of twentieth century science **French Women Philosophers** Christina

Howells,2013-04-15 This reader is the first of its kind to present the work of leading French women philosophers to an English speaking audience Many of the articles appear for the first time in English and have been specially translated for the collection Christina Howells draws on major areas of philosophical and theoretical debate including Ethics Psychoanalysis Law Politics History Science and Rationality Each section and article is clearly introduced and situated in its intellectual context The book is necessarily feminist in inspiration but draws on an unusually wide range of thinkers chosen to represent the philosophy of women rather than feminist philosophy It will be ideal for anyone coming to this area for the first time as well as those seeking to extend their understanding of French thought and Continental Philosophy Articles by the following writers are included Francoise Collin Sylviane Agacinski Catherine Chaler Luce Irigaray Francoise Proust Francoise Dastur Barbara Cassin Natalie Depraz Elisabeth de Fontenay Elisabeth Badinter Francoise Heritier Helene Cixous Monique Schneider Julia Kristeva Sarah Kofman Monique David Menard Francoise d'Eaubonne Genevieve Fraisse Michele Le Doeuff Natalie Charraud Francoise Balibar Anne Fagot Largeault Colette Guillaumin Dominique Schnapper Myriam Revault D'Allonnes Nicole Loraux Mireille Delmas Marty Blandine Kriegel
