A Theory Of Content And Other Essays Representation And Mind Series:

A Theory of Content and Other Essays Jerry A. Fodor, 1990 This collection of new and previously published essays reflects the major research and thought of one of today's preeminent philosophers of mind. The first seven essays are philosophical pieces that focus on mental representation and the foundations of intentionality; these are followed by four psychological essays on cognitive architecture. In his eloquent introduction, Fodor shows how the two areas are thematically united and epistemologically related, highlighting his concern in finding alternatives to holistic accounts of mental content. Fodor's philosophical essays develop an informational view of semantics that offers the possibility of atomism about meaning; his psychological essays present a modular view of cognitive architecture that offers the possibility of atomism about perception. These ideas, he points out, are joined in epistemology in way that the book's last essay begins to explore. Taken together, the essays represent Fodor's lively attempt to knock the underpinnings from the currently popular relativism to show that the arguments for semantic and psychological holism are insubstantial and that important alternatives exist to be explored. Jerry A. Fodor is Professor of Philosophy at Rutgers University and at the City University of New York Graduate Center. A Bradford Book. *Representation in Mind* Hugh Clapin, Phillip Staines, Peter Slezak, 2004-06-04 *Representation in Mind* is the first book in the new series *Perspectives on Cognitive Science* and includes well-known contributors in the areas of philosophy of mind, psychology, and cognitive science. The papers in this volume offer new ideas, fresh approaches, and new criticisms of old ideas. The papers deal in new ways with fundamental questions concerning the problem of mental representation that one contributor, Robert Cummins, has described as THE problem in philosophy of mind for some time now. The editors' introductory overview considers the problem for which mental representation has been seen as an answer, sketching an influential framework, outlining some of the issues addressed, and then providing an overview of the papers. Issues include the relation between mental representation and public/non-mental representation, misrepresentation, the role of mental representations in intelligent action, the relation between representation and consciousness, the relation between folk psychology and explanations invoking mental representations. **The Bloomsbury Companion to Philosophy of Mind** James Garvey, 2015-06-18 Featuring thirteen specially commissioned chapters on core subjects, *The Bloomsbury Companion to Philosophy of Mind* is an essential tool for all those studying and working in the field. Purpose-built for use on courses in this area of philosophy, Beginning with *How to Use this Book*, the Companion includes overviews of perennial problems and new directions in contemporary philosophy of mind, an extended glossary of terms for quick reference, a detailed chronology, a guide to research for ongoing study, and a comprehensive bibliography of key classic and contemporary publications in the philosophy of mind. From new questions concerning qualia, representation, embodiment, and cognition to fresh thinking about the long-standing problems of physicalism, dualism, personal identity, and mental causation, this book is an authoritative survey of the latest research from experts in one of the most active areas of philosophical inquiry.
