Aalborg University Ranking:

Regional Innovation Impact of Universities Robert Tijssen, John Edwards, Koen Jonkers, 2021-05-28 Driven by European Union policy challenges this cutting edge book focuses upon the Regional Innovation Impact RII of universities to analyse the socioeconomic impact that universities in Europe have on their hometowns metropolitan areas and regions

Performance Management at Universities Poul Erik Mouritzen, Niels Opstrup, 2019-07-01 Mouritzen and Opstrup's book is a most welcome addition to the subject of the management of academic performance. It is certainly well worth reading and considering. Bruno S. Frey, Permanent Visiting Professor at the University of Basel and Research Director CREMA Center for Research in Economics Management and the Arts Switzerland. Performance Management at Universities could not possibly be more timely. With universities and university faculty throughout the world being pressed to give more evidence and more precise indicators about their productivity, this thoughtful contribution provides a much needed and unusually thoughtful analysis of the possibilities and pitfalls found in current approaches to university performance evaluation. Given policy makers and politicians' calls for evidence based management and evaluation, let us hope that policy makers heed their own rhetoric and act on the evidence provided here. The authors show that performance measures while sometimes beneficial are subject to gaming and manipulation and that more precision does not necessarily equate with better performance but rather altered performance. This superb book should be read by anyone interested in higher education evaluation as well as by those who are subjected to it. Barry Bozeman, Regents Professor, Arizona Centennial Professor of Technology Policy and Public Management, School of Public Affairs, Arizona State University, USA. In *Performance Management at Universities*, Mouritzen and Opstrup definitively answer the question: What are the effects of national university performance based funding schemes that use bibliometric indicators? As these schemes have proliferated, the question has become urgent. The authors marshal comprehensive data on the Danish university system to sift through the many predictions commonly made by academics newly subject to these systems to identify what actually happened to Danish research as the system took hold. Diana Hicks, Professor, School of Public Policy, Georgia Institute of Technology, USA and first author on the Leiden Manifesto on research metrics. This book gives an account of what can happen when performance management is introduced at universities. How do scholars for better or worse respond to a system which counts the number of articles and books? Many myths exist about scholars' reactions. They cheat, slice their production to the least publishable unit, become more risk averse and will go for the low hanging fruits in short they develop a taste for publication at the cost of a taste of science. Systematic knowledge about the consequences of such systems for the motivation, behavior and productivity of university scholars is in short supply. The book is a major contribution to remedy this situation.

New Perspectives on Using Accreditation to Improve Higher Education Hysa, Eglantina, Foote, Russell, 2022-06-24 Recently the priorities of higher education have adjusted where before the focus was primarily on the financial side of education institutions, now consider people to be their main source of value.

and education to be much more than the production and dissemination of knowledge Due to this a gap has been created between decades of emphasis on financing and the undermining of the qualitative requirements of education New Perspectives on Using Accreditation to Improve Higher Education outlines key issues that must be addressed if accreditation agencies globally are to achieve their primary objective of ensuring that universities and the degree programs they offer are of even greater quality than they are at present Covering topics such as leadership assessment and sustainability this reference work is ideal for principals policymakers higher education staff researchers scholars academicians practitioners instructors and students

Wittgenstein and Education Adrian Skilbeck, Paul Standish, 2023-07-18 WITTGENSTEIN AND EDUCATION Wittgenstein s later writings are abundant with examples and these return repeatedly to scenes of teaching and learning Light is cast on language belief imagination perception illusion and obsession by asking for each how it is acquired How do we come into the practices that make up our lives How beyond the biological do we become human beings Wittgenstein wanted not to spare others the trouble of thinking but to stimulate readers to thoughts of their own Yet so much in education today leads students and their teachers along clearly planned direct routes to achievement to success without the trouble of thinking Knowledge and understanding are displaced by transferrable skills and competences with teacher education reduced to priorities of classroom management skills and curriculum delivery In this climate there is a new growth of interest in the illumination Wittgenstein provides for enquiry into education This collection originating in the Annual Conference of the British Wittgenstein Society in 2018 celebrates this influence and demonstrates the range of Wittgenstein s importance for education

Production and Biorefining of Biocrude Oil: Current Status and Future Developments Mohammad

Aslam, Sanjeev Mishra, Jorge Arturo Aburto Anell, 2025-08-17 This book confers a comprehensive discussion on the production and biorefining of biocrude oil derived from second and third generation biomass feedstocks. It discusses about the concept of biorefinery fundamentals, biorefining raw materials and feedstocks and its associated challenges. The book emphasizes on the 3rd generation biorefining feedstock algae as an emerging feedstock for the biorefineries. In addition, co-feedstocks employed in biorefinery are also deliberated. It also presents various thermochemical conversion approaches such as hydrothermal liquefaction, pyrolysis, Fischer Tropsch process and hydroprocessing. It deals with the sustainable production of biocrude oil from algal biomass and its upgradation for enhanced fuel properties. The book also deliberates on current scenario and future developments in the field of biorefining of biocrude oil and catalysts. A comparative assessment of properties and downstream upgradation of biocrude oil through hydrothermal and pyrolysis processes is presented. Moreover, sustainable production of biofuels and value added products from biorefinery life cycle and techno-economic assessment of the conversion of biocrude oil from pyrolysis and biocrude upgrading technology and challenges are also discussed. This book is a good reference for professionals, post graduate students, researchers and policymakers working in the areas of biorefineries for sustainable development. Populism and Higher Education Curriculum Development: Problem Based Learning as a Mitigating Response

Romeo V. Turcan, John E. Reilly, 2020-11-21 Against a background of increasing inequality and a rising tide of nationalism and populism, this book raises concerns that curriculum is being shaped by powerful non-academic, non-accountable forces and that populism and its manifestations represent a grave challenge to learning. It explores the extent to which curriculum and learning methods in higher education should respond to this challenge. Using problem-based learning as a case study, it draws on cross-disciplinary studies to examine how regional, national and organizational perspectives emphasize different aspects of PBL. It questions whether PBL provides an effective response to external influences and a populist higher education agenda. In conclusion, the book poses an uncomfortable question: whether graduates reflect the external forces shaping curriculum and hence may be as vulnerable to populist rhetoric as non-graduates, precisely because the curriculum and learning methods do not engage with the challenges. This book will appeal to scholars of problem-based learning as well as populism and the role of higher education in society. **The Emerald Handbook of Authentic Leadership**
