Mapping Uncertainty in Medicine Avril Danczak, Alison Lea, Geraldine Murphy, 2016-02-28 Uncertainty is the norm in medical practice yet often gives rise to distress in clinicians who fear they will make shameful or guilt inducing errors This book offers a succinct method to clinicians for classifying uncertainty and finding the right skills to manage

different types of uncertainty successfully Every clinician experiences moments when they don't know what to do Modern medicine is increasingly complex and training has also become more complicated The days of see one do one teach one are over Yet both younger clinicians and senior practitioners describe uncertainty as one of the most challenging and stressful aspects of clinical work If uncertainty is uncomfortable or threatening to individual practitioners it also provides complex educational challenges How can we learn to cope with uncertainty effectively ourselves How can we teach others to understand and manage uncertainty In this ground breaking book the authors propose ways to cut through uncertainty which is explored as an inevitable and even desirable component of clinical practice A Map of Uncertainty in Medicine MUM is used to classify uncertainty and to define the skills that will help find a way through practical difficulties It is always good to have your MUM with you in a tricky situation

The Hidden Psychology of Pain Dr. James Alexander, 2012-10-01 Chronic pain has been correctly described as the invisible crisis at the heart of contemporary life Despite stunning advances in other areas of medical science no similar breakthrough in the treatment of chronic pain has resulted from an exclusive focus on the body Dr James Alexander's young life was redefined by a tragic car accident in his late teens and the chronic physical and emotional trauma inspired him to become a psychologist Now pain free Dr Alexander has dedicated the last three decades of his life to helping others overcome similar challenges specializing in the treatment of chronic pain and psychological trauma His success is proof that recovery from chronic pain is possible and this guide offers a valuable resource for working toward that goal The recovery from chronic pain requires that we revisit and challenge the outdated attitudes and practices that have been used with little result With the proliferation of medical and psychological research for the first time we are at a point in history where these notions of pain recovery can be validated by research based evidence For too long Dr Alexander feels we have been looking in all the wrong places Specifically the problem lies at the core of our culture which still treats the physical and nonphysical aspects of the human as separate experiences This innovative program involves a journey of self discovery a new way to approach medical and psychological care of chronic pain and advice on the most effective types of help to pursue

Protecting Those Who Serve Institute of Medicine, Committee on Strategies to Protect the Health of Deployed U.S. Forces, 2000-10-04 Since the Gulf War ended in 1991 various constituencies including a significant number of veterans speculate that unidentified risk factors led to chronic medically unexplained illnesses and these constituencies challenge the depth of the military's commitment to protect the health of deployed troops Despite general concurrence in findings to support these claims few changes have been made at the field level The most important recommendations remain unimplemented despite the compelling rationale for urgent action Protecting Those Who Serve illuminates these recommendations and government developed plans that remain inactive due to a lack of authority within the Department of Defense while describing the dangers that may result from failure to protect our forces in the field

Bartone,2010 A theoretical model of resilience is presented with special reference to the police officer s job The model includes many factors that are addressed throughout the book and provides a useful framework for considering both the selection and the training issues Section II emphasizes scientifically grounded yet practical approaches for selecting training and preparing personnel to function effectively in security operations Section III presents a collection of both case studies and special life threatening scenarios that workers and leaders in security operations may face The training of new police officers in Kosovo and of local demining teams in Sudan and Iraq are addressed including contagion in the use of deadly force by police and security workers
