Against Physician Assisted Suicide A Palliative Care Perspective:

Against Physician Assisted Suicide David Jeffrey, 2009 The majority of doctors and nurses involved in specialist palliative care reject the legalisation of physician assisted suicide PAS This book explores the reasons why the healthcare professionals who have the most experience of caring for dying patients should object to a change in the law Debate about euthanasia and PAS often arises in response to a well publicised tragic case of unrelieved suffering Such heart rending stories do not reflect the fact that the majority of people dying have a dignified death There is a marked disparity between medical intuitions and the philosophers arguments about euthanasia and PAS It seems that part of the moral constitution of a doctor is a commitment not to intend the death of a patient and to protect them from harm The perspective of those who are privileged to care for thousands of dying patients and their families should inform the debate about PAS This book will enable those who are not working within palliative care to gain an insight into the scope of this speciality and to understand why legalisation of PAS should be resisted to maintain and improve care of dying patients

Physician-Assisted Suicide and Euthanasia Sheldon Rubenfeld, Daniel P. Sulmasy, 2020-11-03 Unlike Nazi medical experiments euthanasia during the Third Reich is barely studied or taught Often even asking whether euthanasia during the Third Reich is relevant to contemporary debates about physician assisted suicide PAS and euthanasia is dismissed as inflammatory Physician Assisted Suicide and Euthanasia Before During and After the Holocaust explores the history of euthanasia before and during the Third Reich in depth and demonstrate how Nazi physicians incorporated mainstream Western philosophy eugenics population medicine prevention and other medical ideas into their ideology This book reveals that euthanasia was neither forced upon physicians nor wantonly practiced by a few fanatics but widely embraced by Western medicine before being sanctioned by the Nazis Contributors then reflect on the significance of this history for contemporary debates about PAS and euthanasia While they take different views regarding these practices almost all agree that there are continuities between the beliefs that the Nazis used to justify euthanasia and the ideology that undergirds present day PAS and euthanasia This conclusion leads our scholars to argue that the history of Nazi medicine should make society wary about legalizing PAS or euthanasia and urge caution where it has been legalized

Enhancing Compassion in End-of-Life Care Through Drama Ewan Jeffrey, David Jeffrey, 2022-03-01 Healthcare professionals spend much of their time listening to stories of sickness related by patients and their families It thus seems appropriate that drama which is primarily concerned with exploring narratives change and crises and relies like the clinical situation on communication is an ideal medium for healthcare professionals to gain new insights into care From the Introduction Good communication forms the heart of patient centred care and is the cornerstone of a trusting relationship Enhancing Compassion in End of Life Care Through Drama explores a broad range of plays from Greek tragedy to the present day and investigates how particular theatrical dynamics help to understand complexities in the setting of end of life care It examines fresh ways to interpret the action and subtext represented on the stage and finds symmetries

in a clinical context It is ideal for use in a range of educational contexts with practical ideas for workshops and summaries of key concepts in each chapter This book will motivate all members of the multidisciplinary palliative care team including palliative care professionals doctors nurses psychologists spiritual advisers and social workers Although based in the setting of palliative care the learning points are relevant to all areas of clinical practice **Alzheimer's Disease, Media**

Representations and the Politics of Euthanasia Megan-Jane Johnstone,2016-04-15 Drawing on extensive data including news media reports and commentaries documentaries courts and court reports films websites professional literature and government and non government agencies this book explores the Alzheimerisation of the euthanasia debate examining the shift in recent years in public attitudes towards the desirability and moral permissibility of euthanasia as an end of life solution for people living with the disease not just at its end stage but also at earlier stages With attention to media representations and public understandings of Alzheimer s disease Alzheimer s Disease Media Representations and the Politics of Euthanasia sheds light on the processes contributing to these changes in public opinion investigating the drivers of vexed political debate surrounding the issue and examining the manner in which both sides of the euthanasia debate mobilise support portray their opponents and make use of media technologies to frame the terms of discourse Paving the way for a greater level of intellectual honesty with regard to an issue carrying significant policy implications this book will be of interest to scholars of media and communication social movements and political communication and the sociology of health and medicine as well as researchers and professionals in the fields of palliative and end of life care **Assisted Dying for**
