Against All Odds Against All Odds:

Against All Odds Funké Michaels, 2011-07-25 In fulfillment of an old Dahomeyan prophesy the 7th generation of the lineage must return to the place of ancestral birth to the beginning of an uneasy journey Nearly two centuries later the Anchor who is the 7th Amazon must respond to that internal call despite the rigorous demands of modern living To find her own place she must complete the cycle of her mothers and make an oar for the next generation AGAINST ALL ODDS is the tale of 7 generations of a royal line whose strong women stand their ground defying social norms and tribal stereotypes defending forbidden love and unwittingly fulfilling the predictions of the ancient oracle This fictional biography takes flight from the pre colonial campaigns of the Amazons of Dahomey female warriors whose codes defined a matriarchal society through the years of slavery in the Americas leading to the Abolition and subsequent return into unfolding socio economic drama and evolving religious beliefs all the way to the harsh realities of modern day West Africa Written with a poetic tone this book will take you on a journey across the many cultures and different experiences that come together to define today's African

Class Degrees Evan Watkins, 2008 A current truism holds that the undergraduate degree today is equivalent to the high school diploma of yesterday But undergraduates at a research university would probably not recognize themselves in the historical mirror of high school vocational education Students in a vast range of institutions are encouraged to look up the educational social scale whereas earlier vocational education was designed to cool out expectations of social advancement by training a working class prepared for massive industrialization In Class Degrees Evan Watkins argues that reforms in vocational education in the 1980s and 1990s can explain a great deal about the changing directions of class formation in the United States as well as how postsecondary educational institutions are changing Responding to a demand for flexibility in job skills and reflecting a consequent aspiration to choice and perpetual job mobility those reforms aimed to eliminate the separate academic status of vocational education They transformed it from a cooling out to a heating up of class expectations The result has been a culture of hyperindividualism The hyperindividual lives in a world permeated with against all odds plots from beat the odds of long supermarket checkout lines by using self checkout and buying FasTrak transponders to beat the odds of traffic jams to the endless superheroes on film and TV who daily save various sorts of planets and things against all odds Of course a few people can beat the odds only if most other people do not As choice begins to replace the selling of individual labor at the core of contemporary class formation the result is a sort of waste labor left behind by the competitive process Provocatively Watkins argues that in the twenty first century academic work in the humanities is assuming the management function of reclaiming this waste labor as a motor force for the future

Against All Odds Betty Ogiel Rubanga, 2017-02-09 This is a true story about a girl child who was orphaned and raised in the most neglected area of Uganda at that time Karamoja Her greatest dream was to get an education but she had to go through so many heartbreaking obstacles to achieve that dream The girl child grew up in settings that are unknown to those
