

COURSE DESCRIPTION:

A course designed for students comfortable performing arithmetic without a calculator and solving linear equations. This course will broaden students' algebra skills to include solving linear inequalities, polynomial factoring, solving quadratic equations, laws of exponents, rational & radical expressions, and graphing of lines. Problem solving involving real-life scenarios is an integral part of this course. This course will teach students to understand and communicate concepts of algebra in the language of mathematics, both orally and written. This course enhances students' problem-solving skills, and helps prepare the student for college-level mathematics and mathematics-based courses. It is nontransferable. Due to the nature of this course, calculators are not permitted. To pass the course, students must pass a mandatory Florida State Examination. (Effective fall 1998, the State of Florida requires that students enrolled in this course must satisfactorily complete the course requirements AND pass the exit test to pass the course.)

COURSE OUTCOMES:

- The student shall be able to identify whole numbers, integers, fractions & mixed numbers, and decimal numbers, perform basic operations on numbers, graph numbers on a number line, and solve appropriate word problems.
- The student shall be able to simplify numerical expressions using order of operations, solve linear equations in one variable, solve literal equations for a specified variable, and solve appropriate word problems.
- The student shall be able to solve linear inequalities in one variable, and express solutions using inequality notation, interval notation, and a number-line graph.
- The student shall be able to simplify product and quotient expressions incorporating variables with integer exponents using appropriate rules of integer exponents.
- The student shall be able to identify, perform operations on, and factor polynomial expressions; solve quadratic equations in one variable; and solve appropriate word problems.
- The student shall be able to identify and simplify rational expressions.
- The student shall be able to identify, simplify, and perform operations of addition and subtraction on radical expressions.
- The student shall be able to identify the quadrants of the rectangular coordinate system, plot points corresponding to ordered-pair coordinates, and identify the ordered-pair coordinates of points plotted on the rectangular coordinate system.
- The student shall be able to evaluate and interpret the slope of a line, graph lines given two points or a point and the slope, use the slope to determine additional points on a line, graph horizontal and vertical lines, and determine the solution to a system of linear equations graphically.
- The student shall be able to identify and create sets, and perform basic operations on sets.
