Anthony G. Picciano, Joel Spring, 2013-05-07 The Great American Education Industrial Complex examines the structure and nature of national networks and enterprises that seek to influence public education policy in accord with their own goals and objectives In the past twenty years significant changes have taken place in the way various interest groups seek to influence policies and practices in public education in the United States No longer left to the experience and knowledge of educators American education has become as much the domain of private organizations corporate entities and political agents who see it as a market for their ideas technologies and ultimately profits Picciano and Spring posit that educational technology is the vehicle whereby these separate movements organizations and individuals have become integrated in a powerful common entity and detail how the educational industrial complex has grown and strengthened its position of influence This timely carefully documented well argued book brings together Picciano's perspective and expertise in the field of technology and policy issues and Spring's in the history and politics of education in a unique critical analysis of the education industrial complex and its implications for the future Queens, Consorts, Concubines: Gregory of Tours and Women of the

Crossroads Juan Cristóbal García-Huidobro, 2021-08-26 The Jesuit educational tradition has existed for more than 450 years and today there are more than 150 Jesuit primary and secondary schools in North and Latin America Jesuit Education at the Crossroads tackles the lack of research on these schools by bringing together scattered studies and asking experts on the issues about the current challenges for Jesuit education The landscape pictured by this collection of essays suggests that Jesuit primary and secondary education is at a historical moment analogous to a crossroads After a crisis between the 1960s and 80s these schools were consolidated establishing themselves in national and international networks But the twenty first century has brought new challenges For instance the secularization of culture is demanding an update of the Jesuit

educational project leadership is rapidly shifting from Jesuits to lay men and women with multiple issues at stake and researchers and policymakers are asking new questions about the role of these schools and school networks for equity and inclusion in each region The book touches on these and other points that will be very relevant for all who are interested in the Jesuit educational tradition
