### **Engineering, Business &**

**Professional Ethics** Simon Robinson,Ross Dixon,Christopher Preece,Kris Moodley,2007-02-19 Engineering as a profession and business is at the sharp end of the ethical practice Far from being a bolt on extra to the real work of the engineer it is at the heart of how he or she relates to the many different stakeholders in the engineering project Engineering Business and Professional Ethics highlights the ethical dimension of engineering and shows how values and responsibility relate to everyday practice Looking at the underlying value systems that inform practical thinking the book offers a framework for ethical decision making Covering global corporate responsibility to the increasing concern for the environment within the engineering business the book offers ways in which value conflict can be handled Integrating practice value and diversity the book helps to prepare the engineer for the ethical challenges of the 21st century This book is essential reading for all students on courses accredited by the Engineering Council e g Civil Chemical Mechanical and Environmental Engineering who need to be aware of ethics Also of interest to practicing engineers and professionals such as Sustainability Managers and Community Workers involved in engineering projects The authors have worked together in the area of engineering professional and business ethics for many years and are all members of the National Centre for Applied Ethics at the University of Leeds

**Biomedical Ethics for Engineers** Daniel A. Vallero,2011-04-01 Biomedical Ethics for Engineers provides biomedical engineers with a new set of tools and an understanding that the application of ethical measures will seldom reach consensus even among fellow engineers and scientists The solutions are never completely technical so the

engineer must continue to improve the means of incorporating a wide array of societal perspectives without sacrificing sound science and good design principles Dan Vallero understands that engineering is a profession that profoundly affects the quality of life from the subcellular and nano to the planetary scale Protecting and enhancing life is the essence of ethics thus every engineer and design professional needs a foundation in bioethics In high profile emerging fields such as nanotechnology biotechnology and green engineering public concerns and attitudes become especially crucial factors given the inherent uncertainties and high stakes involved Ethics thus means more than a commitment to abide by professional norms of conduct This book discusses the full suite of emerging biomedical and environmental issues that must be addressed by engineers and scientists within a global and societal context In addition it gives technical professionals tools to recognize and address bioethical questions and illustrates that an understanding of the application of these measures will seldom reach consensus even among fellow engineers and scientists Working tool for biomedical engineers in the new age of technology Numerous case studies to illustrate the direct application of ethical techniques and standards Ancillary materials available online for easy integration into any academic program

**Research Ethics in Human Geography** Sebastian Henn, Judith Miggelbrink, Kathrin Hörschelmann, 2021-10-25 This book explores common ethical issues faced by human geographers in their research It offers practical guidance for research planning and design that incorporates geographic disciplinary knowledge to conceptualise research ethics The volume brings together international insights from researchers in geography and related fields to provide a comprehensive overview of relevant ethical frameworks and challenges in human geography research It includes in depth reflections on a range of ethical dilemmas that arise in certain contextual conditions and spatial constructions that face those researching and teaching on spatial dimensions of social life With a focus on the increased need for specialist ethics training as part of postgraduate education in the Humanities and Social Sciences and the necessity for fostering sensitivity in cross cultural comparative research the book seeks to enable people to engage in ethical decision making and moral reasoning while conducting research Chapters examine the implications of geographical research for conceptualising ethics and discuss specific case studies from which more general conclusions linked to conceptual debates are drawn As a research based reference guide for tackling ethically sensitive projects and international differences in legal and institutional standards and requirements the book is useful for postgraduate and undergraduate students as well as academics teaching at senior levels

*Understanding Ethics and Ethical Decision-Making* Vincent Icheku, 2011-08-31 This book has been about ethics and ethical decision making As ethical reflection permeates every decision made in practice the book discussed the importance of developing moral reasoning ability which is crucial for handling ethical dilemma and making ethical decisions in nursing and social work practice The book encouraged the use of models as another form of ethical decision making paradigms The book used discussions based on case studies to illustrate how ethics inform practice and allow one to make decisions that are morally justifiable This book will enable our students to gain a step by step

approach to the knowledge and application of Ethics to practice The book drew from the work of many scholars and designed a simple model to help students gain the knowledge of ethical analysis and decision making Vidal Johnson Senior Lecturer in Law and Ethics London South Bank University I was impressed by the way this author consistently addressed both social work and nursing ethical issues highlighting the importance of ethics and application in nursing and social work practice Michelle Evans Senior lecturer in Learning Disability Mental Health and Social Work London South Bank University Most other published books on nursing and social work ethics are often laden with theories and principles This book offers an excellent contribution to the understanding of the relationship between learning ethical theories and principles and their practice applications Jude C Ibe Principal lecturer in Dept of Family Care and Mental Health University of Greenwich London
