Tauber, 1997-02-25 What we expect all too often is exactly what we get Nowhere is this more true than in education where teachers expectations of students are crucial The self fulfilling prophecy should be of great interest to teachers both those in training and those in service Whether or not a teacher is aware of it the self fulfilling prophecy is at work impacting students either to their benefit or their detriment It follows that teachers should be made aware of the SFP and how it can be used effectively in education Using the new on line research facilities Dr Tauber has compiled over 700 doctoral dissertations and countless journal articles on stereotyping perception of social differences race gender ethnicity body features age socioeconomic levels special needs and other personal and situational factors The last part of the book presents a collection of testimonials written from the viewpoint of practitioners *The Will to Learn* Martin V. Covington, 1998 This book introduces the basic principles of motivation as they apply to classroom learning and management in a readable non technical form Covington argues against the popular notion that the problems existing in schools today stem primarily from a lack of student motivation Instead he asserts that students are motivated sometimes even overly motivated but often for the wrong reasons Traditional teaching methods including conventional grading procedures and an emphasis on competition can contribute to student demoralization and Covington identifies the ways in which students respond to misguided incentives For some students motivation is directed at avoiding failure by avoiding participation For others demoralization leads to withdrawal from an educational system that they believe to be irrelevant to their lives Still other students are driven to prove their worth by outperforming fellow students The book suggests practical concrete ways that teachers can use classroom incentives to inspire a desire to learn
