African Mathematics From Bones To Computers:

African Mathematics Abdul Karim Bangura, 2011-02-16 This is the first comprehensive text on African Mathematics that can be used to address some of the problematic issues in this area. These issues include attitudes curriculum development educational change academic achievement standardized and other tests performance factors student characteristics cross cultural differences and studies literacy native speakers social class and differences equal education teaching methods knowledge level educational guidelines and policies transitional schools comparative education other subjects such as physics and social studies surveys talent educational research teacher education and qualifications academic standards teacher effectiveness lesson plans and modules teacher characteristics instructional materials program effectiveness program evaluation African culture African history Black studies class activities educational games number systems cognitive ability foreign influence and fundamental concepts. What unifies the chapters in this book can appear rather banal but many mathematical insights are so obvious and so fundamental that they are difficult to absorb appreciate and express with fresh clarity. Some of the more basic insights are isolated by accounts of investigators who have earned their contemporaries respect. Winner of the 2012 Cecil B Currey Book Award.

Culpability of the Trans-Atlantic Slave Trade Abdul Karim Bangura, 2016-12-07 This book contributes to the debate over the culpability of the Trans Atlantic Slave from various disciplinary perspectives The general thesis that undergirds the book is that by knowing who was predisposed to benefit the most from the trade and why prompting them to initiate it appropriate culpability can be assigned This approach also allowed for a more in depth analysis of the issue from many disciplines making it the first of its kind For the sake of cohesion and coherence some of the major questions addressed by every chapter are quite similar albeit authors were encouraged to fine tune and add to these questions to meet their disciplinary requirements By emphasizing the why in some of the questions a qualitative explanatory case study approach was utilized Both primary and secondary data sources were also used for each chapter to offer a cogent analysis and new information on the topic

Toyin Falola and African Epistemologies A. Bangura, 2015-02-11 While there are five important festschriften on Toyin Falola and his work this book fulfills the need for a single authored volume that can be useful as a textbook I develop clearly articulated rubrics and overarching concepts as the foundational basis for analyzing Falola's work

Corruption in Society Abdul Karim Bangura, James T. Gire, 2023-05-15 Corruption in Society Multidisciplinary Conceptualizations is the first book to address the notion of corruption in a truly multidisciplinary manner augmented with empirical evidence The prevalent definition in books and articles on corruption is that it is a dishonest or fraudulent conduct by those with political and or economic power typically involving bribery This political economy or public

choice denotation while very useful is inadequate for a comprehensive understanding of the concept because the notion of corruption appears in every discipline For example in the field of chemistry chemical corruption concerns a the incorporation of defective compounds into experiments to better simulate conditions on the early Earth and to help us understand how the first molecules of life formed and b how to make chemicals appear safer sometimes dodging restrictions on their use by minimizing the estimates of how much is released into the environment In order to address this shortcoming this book provides a discipline by discipline conceptualization of corruption buttressed with evidence from the discipline
