After Modernity Archaeological Approaches To The Contemporary Past:

After Modernity Rodney Harrison, John Schofield, 2010-07-22 This book summarizes archaeological approaches to the contemporary past and suggests a new agenda for the archaeology of late modern societies The principal focus is the archaeology of developed de industrialized societies during the second half of the twentieth century and the beginning of the twenty first This period encompasses the end of the Cold War and the beginning of the internet age a period which sits firmly within what we would recognize to be a period of lived and living memory Rodney Harrison and John Schofield explore how archaeology can inform the study of this time period and the study of our own society through detailed case studies and an in depth summary of the existing literature Their book draws together cross disciplinary perspectives on contemporary material culture studies and develops a new agenda for the study of the materiality of late modern societies *After Modernity:*

Archaeological Approaches to the Contemporary Past Rodney Harrison, John Schofield, 2010 The authors explore how archaeology can inform the study of our own society and other late modern societies through detailed case studies and a summary of the existing literature They draw together cross disciplinary perspectives and develop a new agenda for the study of the materiality of contemporary societies **The Oxford Handbook of the Archaeology of the Contemporary**

World Paul Graves-Brown, Rodney Harrison, Angela Piccini, 2013-10-17 It has been clear for many years that the ways in which archaeology is practised have been a direct product of a particular set of social cultural and historical circumstances archaeology is always carried out in the present More recently however many have begun to consider how archaeological techniques might be used to reflect more directly on the contemporary world itself how we might undertake archaeologies of as well as in the present This Handbook is the first comprehensive survey of an exciting and rapidly expanding sub field and provides an authoritative overview of the newly emerging focus on the archaeology of the present and recent past In addition to detailed archaeological case studies it includes essays by scholars working on the relationships of different disciplines to the archaeology of the contemporary world including anthropology psychology philosophy historical geography science and technology studies communications and media ethnoarchaeology forensic archaeology sociology film performance and contemporary art This volume seeks to explore the boundaries of an emerging sub discipline to develop a tool kit of concepts and methods which are applicable to this new field and to suggest important future trajectories for research It makes a significant intervention by drawing together scholars working on a broad range of themes approaches methods and case studies from diverse contexts in different parts of the world which have not previously been considered collectively This

Thing Called Theory Teresa Stoppani, Giorgio Ponzio, George Themistokleous, 2016-11-10 In the age of post digital architecture and digital materiality This Thing Called Theory explores current practices of architectural theory their critical and productive role The book is organized in sections which explore theory as an open issue in architecture as it relates to and borrows from other disciplines thus opening up architecture itself and showing how architecture is inextricably connected to

other social and theoretical practices The sections move gradually from the specifics of architectural thought its history theory and criticism and their ongoing relation with philosophy to the critical positions formulated through architecture s specific forms of expression and onto more recent forms of architecture s engagement and self definition The book s thematic sessions are concluded by and interspersed with a series of shorter critical position texts which together propose a new vision of the contemporary role of theory in architecture What emerges overall is a critical and productive role for theory in architecture today theory as a proposition theory as task and as a risk of architecture

Reclaiming Archaeology Alfredo González-Ruibal, 2013-08-21 Archaeology has been an important source of metaphors for some of the key intellectuals of the 20th century Sigmund Freud Walter Benjamin Alois Riegl and Michel Foucault amongst many others However this power has also turned against archaeology because the discipline has been dealt with perfunctorily as a mere provider of metaphors that other intellectuals have exploited Scholars from different fields continue to explore areas in which archaeologists have been working for over two centuries with little or no reference to the discipline It seems that excavation stratigraphy or ruins only become important at a trans disciplinary level when people from outside archaeology pay attention to them and somehow dematerialize them Meanwhile archaeologists have been usually more interested in borrowing theories from other fields rather than in developing the theoretical potential of the same concepts that other thinkers find so useful The time is ripe for archaeologists to address a wider audience and engage in theoretical debates from a position of equality not of subalternity **Reclaiming Archaeology** explores how archaeology can be useful to rethink modernity s big issues and more specifically late modernity broadly understood as the 20th and 21st centuries The book contains a series of original essays not necessarily following the conventional academic rules of archaeological writing or thinking allowing rhetoric to have its place in disclosing the archaeological In each of the four sections that constitute this book method time heritage and materiality the contributors deal with different archaeological tropes such as excavation surface depth genealogy ruins fragments repressed memories and traces They criticize their modernist implications and rework them in creative ways in order to show the power of archaeology not just to understand the past but also the present **Reclaiming Archaeology** includes essays from a diverse array of archaeologists who have dealt in one way or another with modernity including scholars from non Anglophone countries who have approached the issue in original ways during recent years as well as contributors from other fields who engage in a creative dialogue with archaeology and the work of archaeologists

Homeless Heritage Rachael Kiddey, 2017-10-06 **Homeless Heritage** describes the process of using archaeological methodologies to collaboratively document how contemporary homeless people use and experience the city Drawing on fieldwork undertaken in Bristol and York the book first describes the way in which archaeological methods and theory have come to be usefully applied to the contemporary world before exploring the historical development of the concept of homelessness Working with homeless people the author undertook surveys and two excavations of contemporary homeless sites and the team co curated

two public heritage exhibitions with surprising results Complementing a growing body of literature that details how collaborative and participatory heritage projects can give voice to marginalised groups Homeless Heritage details what it means to be homeless in the twenty first century **Archaeology Outside the Box** Hans Barnard,2023-05-15 Archaeology Outside the Box makes contemporary archaeology germane to the general public as well as to researchers in other disciplines In thirty one richly illustrated chapters a wide variety of projects is presented by an international group of anthropologists archaeologists architects and artists These aim to broaden the applicability of archaeology by reflecting on archaeological remains in novel ways or by addressing contemporary concerns with archaeological theory and research methods Demonstrating the fascinating and pertinent nature of archaeology the authors go far beyond its definition as a discipline that unearths objects of ancient material culture Many chapters also provide arguments relevant to the soul searching discussions currently taking place within archaeology worldwide and accelerated by the Black Lives Matter movement and the recent Covid 19 pandemic **Archaeology for Today and Tomorrow** Craig N. Cipolla,Rachel J. Crellin,Oliver J. T. Harris,2023-12-04 Archaeology for Today and Tomorrow explores how cutting edge archaeological theories have implications not only for how we study the past but also how we think about and prepare for the future Ranging from how we understand migration or political leadership to how we think about violence or ecological crisis the book argues that archaeology should embrace a future oriented attitude Behind the traditional archaeological gaze on the past is a unique and useful collection of skills tools and orientations for rethinking the present and future Further it asserts that archaeological theory is not only vital for how we conduct our work as archaeologists and how we create narratives about the past but also for how we think about the broader world in the present and crucially how we envision and shape the future Each of the chapters in the book links theoretical approaches and global archaeological case studies to a specific contemporary issue It examines such issues as human movement violence human and non human relations the Anthropocene and fake news to showcase the critical contributions that archaeology and archaeological theory can make to shaping the world of tomorrow An ideal book for courses on archaeology in the modern world and public archaeology it will also appeal to archaeology students and researchers in general and all those in related disciplines interested in areas of critical contemporary concern *Holocaust Archaeologies* Caroline Sturdy Colls,2015-02-28 Holocaust Archaeologies Approaches and Future Directions aims to move archaeological research concerning the Holocaust forward through a discussion of the variety of the political social ethical and religious issues that surround investigations of this period and by considering how to address them It considers the various reasons why archaeological investigations may take place and what issues will be brought to bear when fieldwork is suggested It presents an interdisciplinary methodology in order to demonstrate how archaeology can uniquely contribute to the history of this period Case examples are used throughout the book in order to contextualise prevalent themes and a variety of geographically and typologically diverse sites throughout Europe are

discussed This book challenges many of the widely held perceptions concerning the Holocaust including the idea that it was solely an Eastern European phenomena centred on Auschwitz and the belief that other sites connected to it were largely destroyed or are well known The typologically temporally and spatial diverse body of physical evidence pertaining to this period is presented and future possibilities for investigation of it are discussed Finally the volume concludes by discussing issues relating to the re presentation of the Holocaust and the impact of this on commemoration heritage management and education This discussion is a timely one as we enter an age without survivors and questions are raised about how to educate future generations about these events in their absence

Archaeology's Visual Culture Roger Balm, 2015-12-14

Archaeology's Visual Culture explores archaeology through the lens of visual culture theory The insistent visuality of archaeology is a key stimulus for the imaginative and creative interpretation of our encounters with the past Balm investigates the nature of this projection of the visual revealing an embedded subjectivity in the imagery of archaeology and acknowledging the multiplicity of meanings that cohere around artifacts archaeological sites and museum displays Using a wide range of case studies the book highlights how archaeologists can view objects and the consequences that ensue from these ways of seeing Throughout the book Balm considers the potential for documentary images and visual material held in archives to perform cultural work within and between groups of specialists With primary sources ranging from the mid nineteenth to the early twenty first century this volume also maps the intellectual and social connections between archaeologists and their peers Geographical settings include Britain Cyprus Mesoamerica the Middle East and the United States and the sites of visual encounter are no less diverse ranging from excavation reports in salvage archaeology to instrumentally derived data sets and remote sensing imagery By forensically examining selected visual records from published accounts and archival sources enduring tropes of representation become apparent that transcend issues of style and reflect fundamental visual sensibilities within the discipline of archaeology
