Anthropology of Migration and Multiculturalism Steven Vertovec, 2013-09-13 The field of anthropology of migration and multiculturalism is booming Throughout its hundred odd year history studies of migration and diverse or plural societies have arguably been both marginal and central to the discipline of Anthropology However recent years have witnessed the rapid growth of anthropological studies concerning these topics This has particularly been the case since the 1970s when anthropologists developed a keen interest in the subject of ethnicity especially in post migration communities Since the 1990s migrant transnationalism has become one of the most fashionable topics There is still much to do in research and theory surrounding this field not least with regard to contemporary public debates around multiculturalism immigration and integration policy This book presents essays pointing toward a number of possible new directions both theoretical and methodological for anthropological inquiry into migration and multiculturalism including innovative ways of examining diversity discourses urban conditions social complexities scales of analysis transnational marriages entangled politics and interwoven cultures This book was published as a special issue of the Ethnic and Racial Studies

Selling EthniCity Olaf Kaltmeier, 2016-04-01 Bringing together a multidisciplinary team of scholars this book explores the importance of ethnicity and cultural economy in the post Fordist city in the Americas It argues that cultural political and economic elites make use of cultural and ethnic elements in city planning and architecture in order to construct a unique image of a particular city and demonstrates how the use of ethnicized cultural production such as urban branding based on local identities by the economic elite raises issues of considerable concern in terms of local identities as it deploys a practical logic of capital exchange that can overcome forms of cultural resistance and strengthen the hegemonic colonization of everyday life At the same time it shows how ethnic communities are able to use ethnic labelling of cultural production ethnic economy or ethno tourism facilities in order to change living conditions and to empower its members in ways previously impossible Of wide ranging interest across academic disciplines this book will be a useful contribution to Inter American studies

Negotiating Cohesion, Inequality and Change Hannah Jones, 2013-09-09 How are multiculturalism inequality and belonging understood in the day to day thinking and practices of local government Examining original empirical data this book explores how local government officers and politicians negotiate difficult subjects linked with community cohesion policy diversity inequality discrimination extremism migration religion class power and change The book argues that such work necessitates uncomfortable positions when managing ethical professional and political commitments Based on first hand experience of working in urban local government and extensive ethnographic interview and documentary research the book applies governmentality perspectives in a new way to consider how people working within government are subject to regimes of governmentality themselves and demonstrates how power operates through emotions Its exploration of how sociological imaginations are applied beyond academia will be valuable to those arguing for the future of public services and building connections between the university and wider society including scholars and students in sociology social policy social geography urban studies and politics and policy practitioners in local and central government Winner of the BSA Philip Abrams Memorial Prize 2014

Cities, Nationalism and Democratization Scott A. Bollens, 2007-04-11 *Cities Nationalism and Democratization* provides a theoretically informed practice oriented account of intercultural conflict and co existence in cities Bollens uses a wide ranging set of over 100 interviews with local political and community leaders to investigate how popular urban policies can trigger pushes from below that help nation states address social and political

challenges The book brings the city and the urban scale into contemporary debates about democratic transformations in ethnically diverse countries It connects the city on conceptual and pragmatic levels to two leading issues of today the existence of competing and potentially destructive nationalistic allegiances and the limitations of democracy in multinational societies Bollens finds that cities and urbanists are not necessarily hemmed in by ethnic conflict and political gridlock but can be proactive agents that stimulate the progress of societal normalization The fuller potential of cities is in their ability to catalyze multinational democratization Alternately if cities are left unprotected and unmanaged ethnic antagonists can fragment the city's collective interests in ways that slow down and confine the advancement of sustainable democracy This book will be helpful to scholars international organizations and grassroots organizations in understanding why and how the peace constitutive city emerges in some cases while it is misplaced and neglected in others

The clamour of nationalism Sivamohan Valluvan, 2019-07-26 Nationalism has reasserted itself today as the political force of our times remaking European politics wherever one looks Britain is no exception and in the midst of Brexit it has even become a vanguard of nationalism's confident return to the mainstream Intellectual attempts to account for nationalism's resurgence have however floundered Desperately trying to read nationalism through one overarching cause as capitalist crisis as cultural backlash or as social media led anti Establishment politics these accounts have proven woefully inadequate This book argues that the only way to understand nationalism is through nationalism itself To understand it as the key force of modernity that calls upon all existing ideological traditions in asserting its appeal whether it is liberal conservative neoliberal or left wing This ideological clamour that characterises today's British nationalism requires both recognition and theorisation A meaningful understanding of new nationalism must reckon with the ideological range animating it and the deeply hostile aversion to different racial minorities that pervades its respective ideologies Drawing on a variety of cultural and political themes ranging from Corbyn's dithering the cult of Churchillism the neoliberal fixation with a point system immigration policy the muscular secularism of Richard Dawkins and friends fears that the white working class have become black and even simply the strange appeal of Harry Potter and Game of Thrones this book provides a dazzling but always detailed study

of how nationalism is the politics of today only because it is a politics of everything
