Cwiertka, Ewa Machotka, 2025-10-01 This multidisciplinary book analyses the contradictory coexistence of consumerism and environmentalism in contemporary Japan It focuses on the dilemma that the diffusion of the concepts of sustainability and recycling has posed for everyday consumption practices and on how these concepts have affected and were affected by the production and consumption of art Special attention is paid to the changes in consumption practices and environmental consciousness among the Japanese public that have occurred since the 1990s and in the aftermath of the earthquake tsunami and nuclear disasters of March 2011 **Asian Law in Disasters** Yuka KANEKO, Katsumi MATSUOKA, Toshihisa TOYODA, 2016-05-20 This book is a critical analysis of several of the most disaster prone regions in Asia Its unique focus is on the legal issues in the phase of disaster recovery the most lengthy and difficult stage of disaster response that follows the conclusion of initial emergency stage of humanitarian aid In the stage of disaster recovery the law decides the fate of reconstruction for the individual houses and livelihoods of the disaster affected people and sets the limit of governmental support for them during the lengthy period of suspension of normal living until full recovery is obtained Researchers who were participant observers in the difficult recovery phase after the mega disasters in Asia analyse the reality of the functions of law which often hinder rather than foster efforts to restore disaster victims lives The book collects research conducted with an emphasis on empirical approaches to legal sociology including direct interviews with people affected by the disaster It offers a holistic approach beyond the traditional sectionalism of legal studies by starting with a historical review and incorporating both spheres of public law and private law in order to obtain a new perspective that can concurrently achieve disaster risk reductions and human centered recoveries With particular emphasis on the unexplored area of law in the post disaster recovery phase this book will attract the attention of students and scholars of disaster studies legal studies Asian studies as well as those who work in the practice of disaster management **Earth-Shattering Events: Earthquakes, Nations, and Civilization** Andrew Robinson, 2016-10-11 A truly welcome and refreshing study that puts earthquake impact on history into a proper perspective Amos Nur Emeritus Professor of Geophysics Stanford University California and author of *Apocalypse Earthquakes Archaeology and the Wrath of God* Since antiquity on every continent human beings in search of attractive landscapes and economic prosperity have made a Faustian bargain with the risk of devastation by an earthquake Today around half of the world's largest cities as many as sixty lie in areas of major seismic activity Many such as Lisbon Naples San Francisco Teheran and Tokyo have been severely damaged or destroyed by earthquakes in the past But throughout history starting with ancient Jericho Rome and Sparta cities have proved to be extraordinarily resilient only one Port Royal in the Caribbean was abandoned after an earthquake *Earth Shattering Events* seeks to understand exactly how humans and earthquakes have interacted not only in the short term but also in the long perspective of history In some cases

physical devastation has been followed by decline But in others the political and economic reverberations of earthquake disasters have presented opportunities for renewal After its wholesale destruction in 1906 San Francisco went on to flourish eventually giving birth to the high tech industrial area on the San Andreas fault known as Silicon Valley An earthquake in Caracas in 1812 triggered the creation of new nations in the liberation of South America from Spanish rule Another in Tangshan in 1976 catalysed the transformation of China into the world s second largest economy The growth of the scientific study of earthquakes is woven into this far reaching history It began with a series of earthquakes in England in 1750 Today seismologists can monitor the vibration of the planet second by second and the movement of tectonic plates millimeter by millimeter Yet even in the 21st century great earthquakes are still essentially acts of God striking with much less warning than volcanoes floods hurricanes and even tornadoes and tsunamis The Times Index ,2011 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Times educational supplement Scotland and the Times higher education supplement Seismic Zonation Walter Hays,Bagher Mohammadioun,Jody Mohammadioun,1998
