Agent Technology from a Formal Perspective Michael Hinchey, Christopher Rouff, James Rash, Walt Truszkowski, Diana F. Gordon-Spears, 2006-01-27 The field of agent indicating open problems to be addressed by future researchers students practitioners

Formal Approaches to Agent-Based Systems Michael G. Hinchey, James L. Rash, Walter F. Truszkowski, Christopher A. Rouff, 2005-01-31 The 3rd Workshop on Formal Approaches to Agent Based Systems FAABS III was held at the Greenbelt Marriott Hotel near NASA Goddard Space Flight Center in April 2004 in conjunction with the IEEE Computer Society The first FAABS workshop was held in April 2000 and the second in October 2002 Interest in agent based systems continues to grow and this is seen in the wide range of conferences and journals that are addressing the research in this area as well as the prototype and developmental systems that are coming into use Our third workshop FAABS III was held in April 2004 This volume contains the revised papers and posters presented at that workshop The Organizing Committee was fortunate in having significant support in the planning and organization of these events and were privileged to have world renowned keynote speakers Prof J Moore FAABS I Prof Sir Roger Penrose FAABS II and Prof John McCarthy FAABS III who spoke on the topic of self aware computing systems auguring perhaps a greater interest in autonomic computing as part of future FAABS events We are grateful to all who attended the workshop presented papers or posters and participated in panel sessions and both formal and informal discussions to make the workshop a great success Our thanks go to the NASA Goddard Space Flight Center Codes 588 and 581 Software Engineering Laboratory for their financial support and to the IEEE Computer Society Technical Committee on Complexity in Computing for their sponsorship and organizational assistance

Autonomy Requirements Engineering for Space Missions Emil Vassev, Mike Hinchey, 2014-08-27 Advanced space exploration is performed by unmanned missions with integrated autonomy in both flight and ground systems Risk and feasibility are major factors supporting the use of unmanned craft and the use of automation and robotic technologies where possible Autonomy in space helps to increase the amount of science data returned from missions perform new science and reduce mission costs Elicitation and expression of autonomy requirements is one of the most significant challenges the autonomous spacecraft engineers need to overcome today This book discusses the Autonomy Requirements Engineering ARE approach intended to help software engineers properly elicit express verify and validate autonomy requirements Moreover a comprehensive state of the art of software engineering for aerospace is presented to outline the problems handled by ARE along with a proof of concept case study on the ESA's BepiColombo Mission demonstrating the ARE's ability to handle autonomy requirements

Agent-Oriented Software Engineering X Marie-Pierre Gleizes, Jorge J. Gomez-Sanz, 2011-03-14 This volume constitutes the thoroughly refereed post conference proceedings of the 10th International Workshop on Agent Oriented Software Engineering AOSE 2009 held in Budapest Hungary in May 2009 as part of AAMAS 2009 the 8th International Conference on Autonomous Agents and Multiagent

Systems The 10 revised full papers presented were carefully selected from numerous initial submissions during two rounds of reviewing and improvement The papers have been organized into three sections on multi agent organizations concrete development techniques and one step higher going beyond the concrete technique and proposing a development method for designing concrete types of systems This state of the art survey is rounded off by five additional lectures addressing key areas in development agent oriented modelling languages implementation of MAS testing of MAS software processes and formal methods for the development of MAS They permit analysis of the current state in the generation of specifications of MAS the way these specifications can be implemented how they can be validated and what steps are necessary to do so

Encyclopedia of Decision Making and Decision Support Technologies Adam, Frederic, Humphreys, Patrick, 2008-04-30 As effective organizational decision making is a major factor in a company's success a comprehensive account of current available research on the core concepts of the decision support agenda is in high demand by academicians and professionals Through 110 authoritative contributions by over 160 of the world's leading experts the Encyclopedia of Decision Making and Decision Support Technologies presents a critical mass of research on the most up to date research on human and computer support of managerial decision making including discussion on support of operational tactical and strategic decisions human vs computer system support structure individual and group decision making and multi criteria decision making

Information Systems Development George Angelos Papadopoulos, Wita Wojtkowski, Gregory Wojtkowski, Stanislaw Wrycza, Jože Zupancic, 2009-09-23 This volume constitutes the published proceedings of the 17th International Conference on Information Systems Development They present the latest and greatest concepts approaches and techniques of systems development a notoriously transitional field

Intermodal Freight Transportation Vasco Reis, Rosario Macario, 2019-09-04 Intermodal Freight Transportation conceptualizes intermodal transport as a set of physical logical financial and contractual flows examining the barriers that impact intermodal freight services and the resulting performance variables The book covers transport modes agents supply and demand patterns key drivers trends influencing the freight transportation sector the evolution of supply and logistics chains and the impacts of technological advancements such as autonomous vehicles and e commerce In addition the book covers transport agents such as shippers freight forwarders integrators and customs as well as the demand for freight transport services and the key properties of goods Readers will find a variety of new tools for analyzing and building effective transport chains that addresses component technology information responsibility and financing dimension along with sections on key organizational regulatory infrastructure and technological barriers The book concludes with a look into the future of the freight transport sector Presents a step by step approach that introduces key topics for understanding efficient intermodal transportation Focuses on the concept of fitness between the modes of transport profiles Contains numerous real world case studies throughout Examines performance metrics
