

Astronomy Study Guide

Gravity

- Gravity is the force that attracts objects toward each other and towards the center
- Gravity is responsible for the orbit of the planets, and for keeping everything in one place.
- Without gravity, we would fall apart
- Gravity does NOT cause things to fall 'down', it causes them to go towards the center.

Rotation

- Rotation means to spin along an axis or imaginary line
- It takes 24 hours for the Earth to rotate
- Examples of spinning objects include: an office chair, ceiling fan, and ballerina.
- The Earth's rotation is what causes day and night
 - We experience night in places that face away from the sun, and experience day in places that face the sun.

Revolution

- Revolution means to go around something, it also means 'orbit'
- Earth and the other objects in our solar system revolve around the Sun, the moon revolves around the Earth
- It takes the Earth 365 days to revolve around the Sun.
- The tilt and revolution of the Earth are responsible for the seasons
