The Arrival of the Fittest Jim Endersby, 2025-01-06 In the early twentieth century varied audiences took biology out of the hands of specialists and transformed it into mass culture transforming our understanding of heredity in the process In the early twentieth century communities made creative use of the new theories of heredity in circulation at the time including the now largely forgotten mutation theory of Hugo de Vries Science fiction writers socialists feminists and utopians are among those who seized on the amazing possibilities of rapid and potentially controllable evolution De Vries s highly respected scientific theory only briefly captured the attention of the scientific community but its many fans appropriated it for their own wildly imaginative ends Writers from H G Wells and Edith Wharton to Charlotte Perkins Gilman J B S Haldane and Aldous Huxley created a new kind of imaginary future which Jim Endersby calls the biotopia It took the ambiguous possibilities of biology utopian and dystopian and reimagined them in ways that still influence the public s understanding of the life sciences *The Arrival of the Fittest* recovers the fascinating long

forgotten origins of ideas that have informed works of fiction from Brave New World to the X Men movies all while reflecting on the lessons positive and negative that this period might offer us The Evolutions of Modernist Epic Václav Paris,2021 Explores how modernist national narrative successively reimagined the evolutionary epic from the 1910s to the 1930s
